MONTHLY SUMMARY

AND COMPLETE SERIES PRICING GUIDE

JANUARY – 1977

Vol. II No. 1 Single copy price: $2.00

Seated Liberty HALF-DIMES

by Kamal M. Ahwash

The CDN is very pleased to present the following article and price chart for the Seated Liberty half-dime series. Mr. Ahwash is one of the country's leading authorities on Seated Liberty material--and this printing of his pricing recommendations for the 1978 "Redbook" should prove invaluable to dealers, collectors and investors alike. (Readers will find that numerous important major varieties which are not part of other price guides are included in this exclusive printing!)

Seated Liberty half-dimes have long been popular with collectors—and this popularity has been steadily gaining momentum in recent years as evidenced by prices realized for Choice BU "type" specimens as well as circulated scarce and rare dates and varieties at auction and through private treaty sales.

As the collector becomes more advanced in the study of Seated Liberty half-dimes, he will begin to appreciate the fact that some of the rarest of all United States coins are to be found in this series. I have spent many a happy hour with scope and glass studying these tiny little coins—and I have found them delightful. There are, it is to be assumed, many as yet undiscovered varieties waiting to be unearthed and brought to light. The constant interchanging of obverse and reverse dies within a single year and between years makes for some very exciting research; very worthwhile discoveries have been made---including some rare ones. The study of minute details of dies, of course, is virtually endless. The recutting, die cracks, overdates as well as large, medium and small dates and mintmarks are all constant sources of excitement. The following comments and prices, however, must necessarily be limited to major varieties in this 1837-73 series. The collector who wishes to become more thoroughly immersed in the finer details of the Seated Liberty half-dime series should first obtain a copy of the 1975 reprint of "The United States Half Dimes" by D.W. Valentine (first printed in 1931)---with additional material by Breen, Davis, Neil, Newlin and myself.

The prices I will now list for the major varieties are those which I have recommended for the 1978 edition of the Guidebook. Most of these varieties are not listed in the current edition and chances are that they will not appear in the next. Nor do they appear in the pricing sections of various other publications. It is a pity that the collecting society has been kept in the dark so long about these major varieties---and I welcome this opportunity to inform those interested in Seated Liberty half-dimes. These varieties have not "popped up" overnight---and it's about time that this pricing information reaches the collecting public! (Please note that prices for uncirculated pieces are for MS-60 coins. The CDN bid-ask prices for MS-65 specimens, of course, accurately apply to the most common dates of the various types. The prices for the scarce and rare dates and varieties in this condition---if, indeed, they do exist---range from at least double to more than triple the MS-60 prices in the chart on page 2.)

AUCTION TRENDS

Last months "Great Southwest Sale" conducted by Steve Ivy Numismatic Auctions, Inc. (Dallas, December 10-11) resulted in many very impressive "prices realized". Among the more than thirteen hundred lots was a substantial number of choice and gem Morgan dollars---and some very noteworthy winning bids were recorded. In the "common date" and "under $50 bid" category several individual coins deserve mention (all descriptions are from the auction catalog):

1879-O	"Gem MS-65+; superb"	$ 55
1880-P	"Gem MS-65+; fully prooflike	$ 85
1883-P	"Gem MS-65; prooflike"	$ 60
1884-P	"Gem MS-65; proolike"	$ 80
1887-P	"Choice MS-60+; proolike"	$100
1889-O	"Gem MS-65; prooflike"	$180
1890-O	"Gem MS-65; prooflike"	$ 70
1896-P	"Gem MS-65; prooflike"	$ 30
1921-P	"Gem MS-65; semi-prooflike"	$ 25
1921-D	"Gem MS-65; full strike"	$ 45

Compare these actual auction prices with current teletype bid levels for MS-65 singles! As is readily apparent, MS-65 or MS-65+ (or even MS-60+, as in the case of the 87-P) specimens with prooflike surfaces spur extremely keen bidder competition---and very substantial "prices realized"!

Carson City issues in top condition also enjoyed strong bidder attention (particularly, again, in prooflike condition):

1878-CC	"Gem MS-65; prooflike"	$ 85
1881-CC	"Gem MS-65; mirror surfaces"	$110
1881-CC	"Gem MS-65+; full mirror surfaces"	$135
1883-CC	"Gem MS-65; full mirror surfaces"	$ 50
1892-CC	"Gem MS-65; prooflike"	$275
1892-CC	"Gem MS-65+; sation surfaces"	$275
1892-CC	"Gem MS-65+; prooflike"	$345
1893-CC	"Choice MS-60+; semi-prooflike"	$475

Two 1889-CC specimens were included in the auction—both were described as "MS-60+; well struck and fully prooflike". They brought $2750 and $2800 against current teletype bids of $1950 for MS-60 and $3150 for full MS-65 specimens!

Even top quality "Redfield" dollars brought prices somewhat in excess of current teletype bid-ask levels:

1886-S	"Gem MS-65"	$165
1888-S	"Gem MS-65"	$160
1890-S	"Gem MS-65; prooflike"	$ 85
1891-S	"Gem MS-65"	$ 53
1898-S	"Gem MS-65"	$160
1898-S	"Gem MS-65; mirror surfaces"	$340
1899-S	"Gem MS-65"	$250
1900-S	"Gem MS-65"	$175

Prices for other S-mint Morgans which apparently were not part of the 1976 release of "Redfield" dollars also fared rather well:

1883-S	"Gem MS-65"	$ 325
1885-S	"Gem MS-65"	$ 65
1885-S	"Gem MS-65+, superb satin surfaces"	$ 90
1903-S	"Gem MS-65; immaculate satin surfaces"	$1550

This auction also contained numerous outstanding coins in most categories—the following are a number of highlights which are of particular interest.

The two common date Two-Cent pieces which were in top "MS-65+" condition were dated 1864 and 1865---they realized $325 and $400 respectively (the current teletype bid for specimens of this quality is $270). A "gem MS-65+" 1872 proof fetched $525 against a Redbook listing of $400. This coin, of course, is far more easily located in proof than in BU condition (refer to the December MONTHLY SUMMARY article on the Two-Cent series).

Three of the late date low mintage Three-Cent nickel pieces were offered in "MS-65" condition. This series was examined in depth in the September MONTHLY SUMMARY and, at that time, bids for these three coins in this condition were: 1882 $200, 1883 $210 and 1887 $250. At auction these three pieces brought respective prices of $260, $350 and $360!

One of the very rare full strike 1926-D Buffalo nickels made its appearance at this auction. It carried a catalog description of "MS-65+, superb—absolute full strike". The successful bidder paid $775! A "gem MS-65+, full head" 1924-D Standing Liberty quarter realized $725 and a "choice MS-60+, full head" 1926-D brought $800!

Bust half dollars are very often subject to overgrading. Actually, AU, "slider" and even MS-60 specimens are relatively plentiful and quite regularly MS-60 or MS-60+ pieces are described as "full MS-65". These somewhat overgraded coins then carry "low" retail price tags or they realize low prices at auction (having been examined beforehand by bidders). This does not mean, of course, that the current reported teletype bid-ask level of $700-$785 is too high---only that true MS-65 Bust halves are far more elusive than is generally recognized. Only two of twenty-six Bust halves in the Ivy auction were graded above MS-60+. Both were among the most common dates in the series---1826 and 1828---they were described respectively as "MS-65, extremely sharp strike" and "MS-65+, superb". They sold for $775 and $825.

Choice Walking Liberty halves continue to enjoy a lion's share of bidder attention---and the Great Southwest Sale" included a number of outstanding examples:

1916-P	"Gem MS-65+, superb, flawless"	$ 510
1916-D	"Gem MS-65, well struck"	$ 300
1916-S	"Gem MS-65, a premium coin"	$ 650
1917-D (Obv)	"Gem MS-65, well struck"	$ 450
1917-S (Obv)	"Gem MS-65, well struck, small planchet flaw"	$ 800
1917-S (Rev)	"Gem MS-65+, superb"	$ 500
1918-P	"Gem MS-65+, superb"	$ 525
1919-P	"Gem MS-65+, fully struck and superb"	$1350
1919-S	"Gem MS-65+, 95% fully struck"	$3800
1920-D	"Gem MS-65+, needle-sharp strike"	$2300
1920-S	"Gem MS-65, well struck"	$1500
1923-S	"Gem MS-65, exceedingly well struck for the for the date	$1500
1929-D	"Gem MS-65, attractive toning"	$ 375

This major auction by the Ivy Corporation is the second to feature a "full color" catalog. This innovation in coin cataloguing is a very unique and welcome step forward in the continuing improvement of the entire industry of numismatics!

* The "type two" 1838-O is distinguished by the fact that date slopes upward to the right and that the entire leg from the knee down was "rusted out" of the die.
** This is Valentine-5, erroneously called an 1845/3 overdate
*** All 1865-S half dimes have a recut date

GOLD SERIES by date

Common date coins in the following listings were computed on a basis of gold bullion at $131.30 per ounce.

Gem MS-65/70 specimens are worth more than the MS-65 prices listed below.

$2½ INDIAN HEAD

Common date "gems" (MS-65/60) are bid $225, ask $250.

	XF/AU BID	XF/AU ASK	UNC (MS-60) BID	UNC (MS-60) ASK	Ch. BU (MS-65) BID	Ch. BU (MS-65) ASK

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.34 per ounce.

Earlier rolls average good; later rolls usually include higher grades.

Vol. II No. 2 Single copy price: $2.00

BUFFALO NICKELS

A study of relative rarity in MS-65 condition

by Larry Whitlow

During the past year or so, strictly choice and gem Buffalo nickels have truly "come into their own". Serious collectors of this series are concentrating on the finest available specimens of each date and they are finding many issues to be far more elusive than other "pricing guides" might indicate! The CDN is pleased to present the following article by Larry Whitlow on the "comparative rarity" of all dates of this popular series in choice, fully struck MS-65 condition. Mr. Whitlow has thoroughly researched the Buffalo nickel for several years now---and his comments in the following article should prove very informative and useful to CDN readers!

The collecting of Buffalo Nickels in MS-65 or better condition can be an arduous task indeed. As nickel tarnishes quite rapidly, like copper, it cannot be "dipped" and restored to it's original brilliance, as can silver coins. Compounding this dilemna we find that the Buffalo nickel series has a wider range of strikes on any given date and mintmark than any other series of U.S. coinage. The infamous 1926 D nickel ranges from an extremely weak strike (sometimes the buffalo's head is virtually obliterated) to a fully struck coin. Weak strikes exist in almost every date and mintmark---so putting a choice, fully struck set together can be a great challenge!

The whole series offers a great investment potential. The Guide Book (GB) prices show relatively minor increases (approx. 30%) over the past decade. However, these prices are probably indications for MS-60 coins as auction records show that MS-65 specimens will bring two to three times catalogue---and sometimes more.

In this article I will only discuss the relative rarity of Buffalo nickels in MS-65 or better condition, well struck. Bear in mind that any Buffalo in GEM condition prior to 1931 is a scarce coin. Frequently a roll of one of the more common P-mints will be broken and dispersed, but they are sold very quickly!

OVERDATES The extremely rare 1918/17-D is undeniably the "stopper" in completing a BU set of Buffalos---probably fewer than 15-20 pieces exist in true mint state! The few pieces I have seen were of medium strike. One of the truly Choice BU pieces available is currently being offered by a major dealer at $17,500!

Mention should be made of the newly discovered 1916/16 overdate. As of this time only a very few uncirculated pieces are known---but quite possibly more will appear as public knowledge of this variety increases. (See the article on this coin in the September MONTHLY SUMMARY.)

PHILADELPHIA ISSUES

1913 (T-1) - Very common in MS-65; gems are a little more difficult---but they can be found without too much trouble.
1913 (T-2) - Though common in MS-60, this date is much scarcer in MS-65 than the T-1; priced lower than T-1 as it is not in demand for a "type" coin.
1914, 15, 17, 19, 20 - All of these 'teen years are pretty common in MS-60, but locating choice, fully struck specimens will be harder than you might think!
1916 - Other than the 1913, this year is the easiest 'teen year to obtain. Keep an eye out for the double die---it is scarce in all grades and rare in uncirculated.
1918 - Probably the most underrated and scarcest P-mint issue in gem condition! Not so rare in MS-60, but very difficult to find well struck.
1921 - Scarce as an MS-65 coin, but not as rare as some think since it always comes well struck.
1923 - Generally seen well struck, but much scarcer than the P-mints from 1925 on.
1924 - The second scarcest P-mint; very rare in fully struck condition.
1925-37 - All rather readily available in well struck BU except the 1928, which is more difficult to find sharply struck. Most of these years still occasionally show up in rolls.

DENVER ISSUES

1913 (T-1) - As in the P-mint, the most common early D-mint issue. Apparently many coins were saved, but, due to toning, fully brilliant pieces are still difficult to locate. Always well struck.
1913 (T-2) - A scarce coin in all grades, this date is surprisingly easy to find in MS-60. Always well struck, MS-65 specimens are not really too difficult.
1914 - A little scarcer than the 13-D (T-2) in MS-60, the 14-D is much scarcer in gem BU---but available.
1915-16-17 - Readily available in MS-60 also, these three years are all very difficult fully struck---probably more so than the 1914.
1918 - One of the scarcest D-mints in MS-65. Usually found weakly struck but full strikes are occasionally available. Retail levels are now in the $900 area!
1919, 1920 - These two rank equally as the rarest coins in the D-mints fully struck. Almost always seen with soft or mushy strikes, fully struck 65+ specimens are extremely rare and when offered are generally in the $1000 range!
1924 - Almost as rare as the 1919 and 1920 when fully struck. An original roll of medium struck coins was broken on the West Coast last year and were immediately dispersed, even though the coins were not of MS-65 quality.
1925 - Equally as scarce, if not scarcer, than the 24-D; almost always seen very weakly struck. Very rare fully struck.
1926 - Long regarded by many as the rarest fully struck nickel in the series---but slightly overrated. Though usually seen very weakly struck, it is available in well struck BU far more readily than the 19, 20, and 25-D. Very scarce---but not rare!

THREE-DOLLAR GOLD SERIES

AS IT STANDS TODAY

This month the CDN takes a look at the current status of the Three-Dollar Gold series. As many readers know, interest in "dated" gold pieces has been relatively limited for some time now---having dropped off rather sharply after the peak market reached about two and a half years ago. During the past several months prices across the series have more or less levelled within present ranges---with (as in most other areas of numismatics) exceptions noted for truly outstanding specimens. In this area, too, quality has become the all-important consideration.

As "type" coins, collectors more often than not buy one of the easily available large mintage issues---usually 1874 or 1878 (or, in the lower grades, one of the relatively higher mintage dates in the 1854-59 group). In comparing the current $295-$325 bid-ask range for XF/AU specimens with the price levels of two years ago we encounter a 34% loss from the January of '75 bid of $450---and an 18% drop from the $350 bid level recorded in January of last year. In the MS-60 grade the loss has been less dramatic. Two years ago dealers were offering to pay $950 for pieces of this quality---this is 10% less than the present bid of $850. Even "choice MS-65" specimens have ended the past two year period with a small loss of 8%; the bid in early 1975 was $1750 as compared with the present $1600 level. One must also consider the fact that grading standards have been somewhat "tightened" during the past couple of years. Quality conscious collectors are sometimes a bit disappointed when they take another look at the coins purchased as "choice" a few years ago---many of them simply do not stand up under the close scrutiny given to top grade specimens today.

In general, losses suffered during the past two years by the scarce and rare "dated" pieces have been even more substantial than those registered by "type". According to one major dealer who regularly trades in this series, price ranges have dropped as much as fifty percent for circulated coins and up to twenty-five percent for MS-60 examples. As a result, there is a rather widespread reluctance by dealers to stock the better dates. There are exceptions. Most dealers will buy these issues if the "price is right"---but potential sellers are very often disappointed with the offers they currently receive for circulated better date pieces. But then, of course, the rarely encounted choice MS-65 specimen of a low mintage issue will attract a number of buyers---as will top quality in any series.

BUFFALO NICKELS *(Continued from page one)*

1927 - One of the sleepers in the series, the 27-D is very scarce in mint state and quite rare fully struck. At it's Guide Book listing of $62 it is an excellent buy! Locating a gem will be extremely difficult.
1928 - Quite common in MS-65 though full strikes are somewhat more difficult.
1929 - Another sleeper! Though common in MS-60, a very rare coin in MS-65. Sales records of gems have been recorded as high as $160!
1934, 1935 - These are two of the rarest coins in series in fully struck MS-65 condition. Though average strikes are available in roll quantities, gems are extremely rare. Very comparable to the 45-P dime. A private sale of a fully struck 35-D has been recorded at $150.
1936 - A lot harder than you might think in gem condition.
1937, 38 - Easy to get.
1937 "Three-legged" - A very rare coin in mint state! Always sharply struck, it abounds in AU-50 and AU-55. Most coins offered as BU are really "sliders". The GB value of $375 is quite obsolete on this coin; true MS-65 specimens worth upwards of $1000!

SAN FRANCISCO ISSUES

1913 (T-1) - Common as an MS-60 coin---but quite rare fully struck. Many come with a mushy mintmark.
1913 (T-2) - As with the 13-D (T-2), this coin is scarce in all grades but relatively easy to find in the MS-60 grade. Gems are very, very hard to find. Usually fairly well struck.
1914 - Not to hard to find in MS-65; one of the easier early S-mints.
1915 - Always found well struck; scarce in all high grades.
1916 - Quite common as MS-60---very rare in fully struck 65.
1917 - As the 15-S often found well struck---but quite scarce in gem condition.
1918 - One of the scarcer S-mints, these are usually found on the weak side---but they are available fully struck and are rare as such.
1919 - Almost always found very weakly struck, the 19-S is one of the rarest dates in the series fully struck. A gem would bring a record price---if there is one!
1920 - This date has the distinction of being the rarest buffalo of all in mint state, regardless of strike (excluding the overdate)! It is certainly worth far in excess of it's GB listing of $250---even in MS-60---and a MS-65 is extremely rare!
1921 - Another rare coin in mint state, but far more readily available than the 19-S and 20-S. Usually found with a medium strike, fully struck gems do exist. A major dealer reports sale of a superb specimen at $1350!
1923 - Almost always found weakly struck, this date is very difficult to locate in full strike condition. MS-60 coins are available around GB value of $200 but fully struck MS-65 specimens are worth far in excess of this price.
1924 - Generally considered to be rarest of the buffalos in BU, probably due to it's rarity in all higher grades. Usually found with a medium strike, this date is probably overpriced as an MS-60 coin in the GB in comparison with some of the other dates. Fully struck specimens, however, are very rare and are worth more than the GB listing.
1925 - Like the 19-S, almost always found very weakly struck. Not particularly rare in MS-60---but full strikes are very rare.
1926 - With the lowest mintage of the series, the 26-S is rightfully rare in mint state, regardless of strike. Generally found with a medium strike, it is well worth its GB value of $500; MS-65 coins will bring much more!
1927 - Almost always found well struck, the 27-S appears at first to be relatively common in mint state. High grades, XF to AU-55, abound in quantity---but the avid collector will soon find that most all coins offered as mint state are indeed "sliders" or AU-55 coins. This date is notorious for having full mint luster and a slight "rub", particularly on the reverse. Choice coins are very scarce. Some examples also exist with slight proof surface.
1928 - Generally found fairly well struck, gem specimens are very scarce---and an excellent buy at current levels.
1929 - A very underrated date in comparison to the common dates in the series; much scarcer than GB indicates. Usually well struck.
1930 - Though nice specimens are readily available, finding a full strike will be very difficult. MS-65 specimens are really far scarcer than the much lower mintage 31-S.
1931 - Though the second lowest mintage in the series, the 31-S is quite common in mint state as it was hoarded immediately after issue. The connoisseur will still have a hard time finding that fully struck gem!
1935, 36, 37 - Around in rolls, but it will take a lot of searching to find true gems.

THE THREE-DOLLAR GOLD SERIES
(Continued from page one)

However, all is not doom and gloom in the Three-Dollar Gold series! The above mentioned top quality pieces not only are of interest to dealers who trade in this area, but they also continue to realize impressive prices when offered as part of a major auction. (This is particularly true if a "run" of dates is offered and a number of serious collectors gather from all parts of the country.) There are dates in this series which are so seldom available in strictly "MS-65 or better" condition that the overall tone of the market has no affect. It should also be remembered that numerous collectors began concentrating on this series when prices were soaring and that many are still interested in locating dates which are missing from their collections. Thus competition for the scarce and rare issues in top condition remains quite keen.

In addition---and importantly---there are those collector/investors who see the current market situation as an opportunity---a chance to buy scarce and even rare dates at a considerable reduction over the bourse table and auction prices of two or three years ago. Several dealers now have a "working relationship" with clients whereby they pass along higher grade circulated and AU/UNC specimens of the better dates at only a small profit---preferring this quick turnover method to the alternative of stocking such pieces for an undetermined length of time. Those who are taking advantage of today's general lack of interest in anything less than full MS-65 coins are accumulating some very tough dates at prices not too much in excess of current bid-ask levels for common date "type" coins!

Current dealer buying prices for all collectable dates in the Three-Dollar Gold series---in all grades from VF through MS-65---have been compiled and are presented in the following chart. Again it should be emphasized that these are today's rather low levels---reflecting prices that dealers will pay in order not to "stock" the pieces for too long a time. In many cases these levels may be half those which the same coins were bringing a few years back. Collectors and investors who are intrigued by today's prices should find this compilation useful---and, of course, potential sellers will gain a better perspective of the market as it stands now. The "blanks" in the MS-65 column for such dates as 1854-D, 1855-S, 1860-S are simply due to the fact that specimens of this quality are so rare (if, indeed, they exist at all) that only a current sale record would be meaningful. It is interesting to note that even though the "Redbook" continues to list prices for these dates in "Unc", Don Taxay in the Scott's "Catalogue and Encyclopedia of U.S. Coins" lists them as "unknown" in uncirculated condition. The MS-60 prices listed for these dates in the following chart are a result of dealer attempts to locate these rarities and reflect a minimum of what knowledgeable dealers would pay if such a specimen were to come to light!

	VF	XF	AU	MS-60	MS-65

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.46 per ounce.

Earlier rolls average good; later rolls usually include higher grades

Vol. II No. 3 Single copy price: $2.00

An in-depth look at the

MERCURY DIME SERIES

It is only in the last few years that whether a Mercury dime exhibits "full bands" or not has become a major factor affeeting price. A few years ago, most collectors were only vaguely aware that many issues were difficult to acquire in this ultimate condition---and, in most instances, choice original frosty eoins with or without fully separated bands brought more or less the same price. However, as prices advanced---and as colleetors became more and more aware of such distinctions as MS-60, MS-65, "full heads", "full skirt lines" and so on---fully struck Mereury dimes started to assume an increasing amount of importance. Today---in this almost totally quality-conscious market---the premium for "full bands" Mereuries has become quite substantial. And, in addition, even the degree of separation of the bands in now considered as crucial by many serious colleetors.

There are several issues (1917-S and 1930-S are prime examples) that can be located rather easily with a light separation between the bands---but with the bands themselves rather flat. We will call this degree of separation "average strike" or "partially split bands". These same issues with fully rounded split bands, however, are elusive. Although this further distinction may seem a bit extreme to those not thoroughly immersed in the collecting of Mercury dimes, it appears that this distinction is here to stay. Actually, "partially split" and "fully rounded" are terms which are closely paralleled by the similar grading distinctions of "¾th head" and "full head" in the Standing Liberty quarter series. Price variances for Mercuries will probably become even greater than they are now as more and more information about true scarcity of fully struck pieces becomes more widely known. We hope that the following analysis will give collectors and investors a further insight into the now popular and widely collected Mercury dime series.

THE PHILADELPHIA ISSUES

It is very interesting that the rarest regular issue "full bands" Mercury dime from any mint is among the four or five most common dates in original BU condition. At present, there are less than a dozen fully struek 1945-P dimes known! Mint-wrapped rolls are plentiful---and at least one original BU bag changed hands within the past year---yet those who have anxiously searched these rolls have yet to come up with additional fully struck specimens. It is still possible, of course, that more examples will come to light---there undoubtedly original rolls which have yet to be checked. The above mentioned original BU bag was searched, however, and not a single strictly "full bands" piece was found! The value of the few known examples is rather difficult to determine. Numerous dealers have "want lists" which include this issue---and dealer buy prices currently range from $300 to $400 for the "right coin"! A roll or two---if ever located---might deflate this balloon---but most serious eolleetors do not want to depend upon this possibility. The mintage of the 45-P is a very high 159,130,000.

The following is an examination of the remainder of the Philadelphia coins in order of issue:

1916-P (22,180,080) - Easy to locate in all grades; still, this issue should be checked carefully---since first-year-of-issue coins were very often improperly preserved and "cabinet friction" is frequently encountered. A large percentage of the extant MS-65 speeimens are fully struck; the current bid-ask structure is commensurate with availability.

1917-P (55,230,000) - In spite of a lower Guidebook listing, this second Philly issue is a bit more scarce than the 1916-P. However, the percentage of choice MS-65 speeimens with strictly "full bands" is adequate to meet current demand---and, again, current prices are about in line with scarcity.

1918-P (26,680,000) - Next to the above discussed 1945-P, the percentage of MS-65 specimens with fully rounded bands is by far the lowest of any other P-mint. Dealers find that present bid levels produce very few results---and retail sales of gems have been recorded as high as $150 in recent months. Gains should exceed the series average. (Higher grade circulated pieces are also relatively scarce.)

1919-P (35,740,000) - Only moderately scarce in original MS-65 condition---with a fairly large percentage of fully struck pieces available. Adequately priced at current levels; normal gains expected.

1920-P (59,030,000) - Rolls are still known---with "full bands" specimens relatively easy to locate. The current priee range properly represents scarcity.

1921-P (1,230,000) - This lowest mintage regular issue P-mint is scarce in all grades. Top dollar is regularly realized at auction and thru retail sales, yet it is not difficult to locate fully struck MS-65 specimens on the bourse tables of major dealers. In relation to numerous other issues, the 21-P is a bit over-valued in comparison with its availability in the ultimate "full bands" condition.

1923-P (50,130,000) - As with the 1920-P, this issue is still available by the roll on widely scattered occasions. "Full bands" pieees are fairly plentiful and eurrent prices are on target.

1924-P (24,010,000) - Again, original rolls are known---with at least three changing hands within the past year. Strietly "full bands" examples, however, are more elusive than either the 1920-P or 1923-P as the current higher bid-ask priee range indicates. (The rolls recently traded are lovely original coins---but the bands are just barely separated on most pieees.) Gems have sold at recent auction in the $90 area.

1925-P (25,610,000) - In relation to the 1924-P, this issue is somewhat undervalued. The mintages are similar and "full bands" speeimens are no more plentiful. A faster than normal priee appreciation wouldn't be unexpected.

1926-P (32,160,000); 1927-P (28,080,000); 1928-P (19,480,000);
1929-P (25,970,000) - All four are rather easy to locate---with the 28-P being the seareest and the 29-P the most common. The percentage of fully struek pieces is relatively high. This month's higher bid levels accurately represent eurrent availability.

1930-P (6,770,000) - Although "full bands" specimens are loeated without a great deal of searching, this fairly low mintage issue is still a bit under-valued. In contrast to the 1930-S, original rolls are rarely encountered. A faster than average appreciation would reflect aetual scarcity.

1931-P (3,150,000) - This is the seeond lowest regular issue P-mint---and, in spite of its current rather nominal price range, the 31-P is scarcer than either the 1931-D or 1931-S in MS-65 condition. (The pereentage of "full bands" speeimens is higher than the 1931-S and lower than the 1931-D.) However, the popularity of the two low mintage branch issues keeps this date in the background. There is considerable room for price advances---but chances are that gains will remain in the "normal" category.

1934-P (24,080,000); 1935-P (58,830,000); 1936-P (87,504,130);
1937-P (56,865,765); 1938-P (22,198,728); 1939-P (67,749,321) - The percentage of fully struck pieces in all of the above issues is relatively high---most original rolls tend to be very nice. At current prices, the 38-P and 39-P probably present the best opportunities for future appreciation.

1940-P (65,361,827); 1941-P (175, 106,557); 1942-P (205, 432,329);
1943-P (191,710,000); 1944-P (231,410,000) - Currently these late eommon date issues are enjoying rather definite investor demand. All are easily located in fully struck condition---and only the 40-P seems a bit under-priced in relation to the others in this group.

THE DENVER ISSUES

1916-D (264,000) - This, of course, is unquestionably the most "popular" date in the entire Mercury dime series. Its very low mintage coupled with years of publicity has assured its place on the list of coins "most wanted" in any grade. A very large percentage of the extant specimens fall either into the AG to VG range or in the AU/"slider" category. Examples in the full Fine to strictly XF range are relatively scarce and ehoice MS-65 pieces are, naturally, quite elusive. On the otherhand, of the MS-65 specimens on the market, a relatively high percentage are fully struck. Adding a choice "full bands" 16-D dime to a collection is more a matter of paying the price than of searching out a fully struck piece. (Recent auction records of gem "full bands" 16-D's have been in the $3000 area---with an occasional sale noted as high as $3500!)

1917-D (9,402,000) - This is not a common coin in any of the higher grades---and choice MS-65 or better specimens with fully struck bands are as yet quite under-valued in relation to numerous other issues. Retail sales as high as $250 have been recorded in recent months---and dealers have a difficult time filling orders on this date in spite of the present rather reasonable bid level. Chances are that the fully struck 17-D will record better than average gains in coming years.

1918-D (22,674,800) - It is generally agreed by dealers who specialize in this area that fully-struck 18-D's constitute the lowest percentage of original BU pieees of any Denver Mercury dime. The mintage is very high for an early branch mint issue and flat or average strikes are fairly plentiful in original BU condition---but recently escalating bid prices for "full bands" specimens are almost totally unsuceessful. Dealers who have such pieces in stock are eurrently asking---and getting---as much as $250-$300!

1919-D (9,939,000) - Even though this is a low mintage issue, original rolls are still known---and one is oceasionally dispersed. Most of the coins in these rolls, however, do not fall into the strictly "full bands" category; specimens of the ultimate quality are quite few and far between. The current bid does not produce many results and dealer price tags on the elusive fully struck example is usually $300 or more. This is still a relatively under-priced coin in the top grade.

1920-D (19,171,000) - This is another large mintage branch mint issue---fairly plentiful in original MS-65 condition and only moderately scarce with "full bands". Many specimens have fully struck bands and are weak at the date---gems with strong dates often change hands in the $200 area at the retail level.

1921-D (1,080,000) - The second lowest regular D-mint issue; scarce in all grades---particularly in the VF/XF range. However, fully struck MS-65 or better specimens are a bit over-rated in relation to the percentage of BU pieces which exhibit "full bands". Actually, this is a very well struck issue and, when located in original BU condition, 21-D's tend to be well struck. As with the 1916-D, obtaining this date is more a matter of price than of a long search for top quality coins.

1924-D (6,810,000) - As with the 1921-D, a large percentage of the available original MS-65 pieces have "full bands". This issue is adequately priced at current levels; current retail sales of gems range at around the $300 mark. "Sliders" are fairly common—so thoroughly checking even "full bands" specimens is recommended. (Of course, checking all purchases is recommended---but some dates are known for the number of "rubbed" pieces available.)

1925-D (5,117,000) - This is a tough date in all higher grades. Of the MS-65 specimens available, however, a relatively healthy percentage have fully struck bands. Dealers who specialize in Mercuries usually have a specimen or two in stock---with price tags in the $600 area. The date is often weakly struck as is the "E" of ONE on the reverse.

1926-D (6,828,000) - Not particularly scarce in original BU condition, the percentage of fully struck 26-D's is slightly lower than the 1924-D or 1925-D. Still, with enough "full bands" pieces to go around at present, the current price level is more or less in line with scarcity.

1927-D (4,812,000) - The scarcity of this issue parallels that of the 1925-D---rather elusive in the higher grades and quite scarce in original MS-65 condition. Again, however, many of the truly BU pieces located have "full bands". Prices for top grade specimens may well narrow the gap between this date and the higher priced 1925-D.

1928-D (4,161,000) - At least major dealer has listed this issue among the top dozen dates that he finds elusive in "full bands" MS-65 condition. This is a relatively low mintage issue and is fairly difficult to find in grades above VF. Although about the same percentage of fully struck pieces is found among BU 28-D's as among the 1924 thru 1927 Denver issues, this leaves a rather small number of top quality specimens available on the market. This issue should have a bright future.

1929-D (5,034,000) - Still available on occasion by the roll---but many are of flat or average strike condition. Choice MS-65 specimens with fully rounded bands are still very reasonable at the current ask price---or slightly higher.

1931-D (1,260,000) - This is a rather common date which brings a substantial price because of a low mintage and considerable popularity. The 31-D is by far the most plentiful 1931 issue---rolls appear with some regularity. In addition, most pieces are well struck and "full bands" specimens often comprise an entire roll. Still, auction records consistently top $200! Definitely over-rated in relation to scarcity.

1934-D (6,772,000) - Only moderately scarce in choice MS-65 fully struck condition. Today's bid price results in sufficient sales to satisfy demand---yet a "promotion" would probably advance prices considerably as this is the second lowest mintage in the 1934-1945 "short set". Sometimes available with a prooflike strike.

1935-D (10,477,000) - Even though the mintage is substantially higher than the 1934-D, the 35-D is the "key" of the "short set". There are fewer original BU specimens available---with a smaller percentage of "full bands" among them. Retail sales of gems have been noted in the $110-$125 range.

1936-D (16,132,000) - A couple of original rolls in the hands of dealers have resulted in a mild "promotion" during recent months. Still, this date is probably as scarce as the 1934-D---with about the same rather high percentage of full strikes found among the extant BU's.

1937-D (14,146,000); 1938-D (5,537,000) - The 38-D was saved in a greater quantity than the much higher mintage 37-D. The percentage of full strikes is about the same for both issues; prices should continue to advance in an orderly manner. (The 38-D is another issue which is occasionally located in choice prooflike condition).

1939-D (24,394,000); 1940-D (21,198,000); 1941-D (45,634,000) - Of about the same scarcity, these three dates have all been "promoted" to some degree within the past year or so. Full strikes are plentiful among the original rolls which can still be located; current prices are adequate---gains will probably be normal unless a "push" is instigated by someone with a quantity of rolls.

1942-D (60,710,000), 1943-D (71,949,000); 1944-D (62,224,000);
1945-D (40,245,000) - Rolls, of course, are easily located---although in recent weeks these late date mintmarked issues have been a bit more elusive. Again, these are dates which are subject to dealer "promotions". None are scarce in fully struck condition.

THE SAN FRANCISCO ISSUES

1916-S (10,450,000) - "Sliders" abound---and flat to average strikes are easy to locate. But that choice MS-65 specimen with fully rounded bands is actually quite elusive. The current bid level is not very effective---and retail sales of gems are not uncommon at around the $100 mark.

1917-S (27,430,000) - This is the highest mintage branch mint issue in the 1917-30 group and is very easy to locate in all grades thru original MS-65 with "partially split bands". However, specimens with fully rounded bands are surprisingly difficult to find and such pieces are very under-priced at current levels. (A dealer recently paid $150 for a true gem at auction.)

1918-S (19,850,000) - Another high mintage branch mint issue which is vastly underestimated for full strike condition. Even more elusive than the 1917-S, this issue is also easily found in all grades thru average strike MS-65. All lists of "tough dates" from Mercury dime specialists place this date near the top (most at the top of the listings) in "full bands" condition. This would be a date to acquire one quality specimen if located at any fairly reasonable price!

1919-S (8,500,000) - The scarcity of fully struck 19-S's has been realized during the past couple of years---and prices for true "full bands" pieces have been substantial. Still, this date is close to top of the list of tough Mercuries---and, due to a low mintage and a small percent of fully struck pieces, future substantial gains are virtually assured.

1920-S (13,820,000) - Plentiful in all grades thru average strike MS-65---moderately scarce with fully rounded split bands. The current price structure seems a bit low in relation to actual scarcity. Often weakly struck at the date, fully struck pieces with a strong date should command a premium on top of the "full bands" price.

1923-S (6,440,000) - This issue appears in the top twelve or fourteen "most elusive with full bands" list of several major dealers. The 23-S is rather easy to find in any grade thru average strike MS-65---and "sliders" are relatively common. (Actually, nearly all of the S-mints are found in "slider" condition quite frequently---a word to the wise!) Fully struck 23-S's usually sell at the retail level in the $300-$350 range.

1924-S (7,120,000) - Of about equal scarcity with the 1923-S; bid is currently the same and retail sales levels are also similar. This issue offers perhaps more "sliders" and MS-60 coins than any other S-mint in the 20's.

1925-S (5,850,000) - A lower mintage than either the 1923-S or 1924-S---with about the same percentage of BU pieces falling into the MS-65 "full bands" category. Prices, therefore, are somewhat higher than the preceeding two S-mints---and recent attempts to buy choice specimens have raised price levels to a point where retail sales are now well over double the current Guidebook listing.

1926-S (1,520,000) - This lowest mintage S-mint has been registering recent auction sales records in the $1200 area. So few original BU examples are available---with only a moderate number of fully struck coins among them---that this issue is well up on dealers' lists of tough Mercuries. Low mintage, true scarcity and demand will continue to combine to keep this date in its position as a pacesetter of the series.

1927-S (4,770,000) - The mintage of this issue is lower than any previous S-mint except the 1926-S---and, in addition, the percentage of full strikes is lower than that of the 1923-S thru 1926-S issues. Knowledgeable dealers list this date behind only the 1918-S and 1919-S in scarcity with fully rounded bands (well ahead of even the 1926-S percentagewise). Another issue with a bright future.

1928-S (7,400,000) - Only moderately scarce---the highest San Francisco mintage in the 1923-31 group with a healthy percentage of fully struck specimens available. An original roll of choice "full bands" pieces was dispersed last year---and other original rolls are known. Current prices are correct---only moderate gains expected.

1929-S (4,730,000) - This has long been considered a common coin, but recently dealers have found choice specimens more elusive than previously thought. Even though the percentage of fully struck coins is higher than the earlier S-mints, the overall mintage of the 29-S is surprisingly low in view of current price levels (it is lower than any of the 1923-28 issues except 1926-S). "Sliders" are very common; strictly choice pieces should perform very well in coming years.

1930-S (1,843,000) - Rolls of this low mintage issue are still being broken up---with most of the coins having "partially split" bands. Finding a specimen with fully rounded bands is very difficult, however---and therefore the 30-S enjoys a high position of the list of elusive Mercuries in the ultimate condition. Auction records in the $250 area are regularly noted.

1931-S (1,800,000) - This date is considerably more scarce in original BU condition than the 1930-S---with a far smaller number of rolls known. Still, the available pieces are somewhat better struck---and the current pricing structure is quite adequate. Normal gains should be expected.

1935-S (15,840,000); 1936-S (9,210,000); 1937-S (9,740,000) - A "promotion" a year or so ago pushed the 36-S well ahead of the other two dates in this trio. In spite of a higher mintage, however, the 35-S is just as scarce as the 36-S---with the 37-S the most readily available. There are sufficient full strikes in all three issues to satisfy demand.

1938-S (8,090,000); 1939-S (10,540,000) - The 39-S is far more scarce than the lower mintage 38-S---and the percentage of "full bands" pieces is lower. Both issues should continue to register better than average gains---but the 39-S probably will outperform the earlier issue. Both are found with full prooflike surfaces.

1940-S (21,560,000); 1941-S (43,090,000); 1942-S (49,300,000) - The scarcity of these three S-mints is directly opposite to what mintage figures might imply---the 40-S is the most plentiful roll and the 42-S the most scarce. None, however, are really tough to locate---and all present a large percentage of fully struck specimens.

1943-S (60,400,000); 1944-S (49,490,000); 1945-S (41,920,000) - As with the late Denver issues, these S-mints are currently enjoying investor demand. None are really scarce---and, again, fully struck rolls are around in quantity.

1945-S (Micro-S) - Rolls are encountered frequently---with plenty of full strikes available. Current prices are in line with scarcity.

THE OVERDATES

1942/41 P - During the past year an original roll made its startling appearance on the market. Until this time, this issue was definitely the rarest Mercury dime in original BU condition---with or without fully separated bands. Apparently most of the specimens in the original roll had "full bands"---so now the "lowly" 1945-P reigns supreme in this category. Still, of course, the 42/41-P remains a rare coin in strictly MS-65 condition---with at least one specimen realizing an impressive $4500 at a recent auction! Dealers will currently pay in the $2700-$3000 range according to the quality of the individual coin.

1942/41-D - This late addition to the Mercury dime series was only recently added to the Guidebook---and has yet to be included in albums. It is not yet determined where this issue will fall in the rarity scale of either "flat bands" or "full bands" Mercury dimes. At this point, it is agreed that truly MS-65 specimens are quite rare. However, rumors of an original half roll or full roll persist, it is going to take a while yet for this issue to assume its rightful place in the series. So far, most collectors are content with only the P mint overdate. Actually, an original roll of the Denver issue would go a long way toward making the D-mint more generally accepted. Dealers will currently pay only slightly more for circulated specimens than they will for the Philly version. A price level for the MS-60 as well as MS-65 grade is not truly established as yet. A gem, if offered, would probably sell at auction for at least $1000 perhaps considerably more.

GOLD SERIES by date

Common date coins in the following listings were computed on a basis of gold bullion at $146.40 per ounce.

Gem MS-65/70 specimens are worth more than the MS-65 prices listed below.

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.81 per ounce.

Earlier rolls average good, later rolls usually include higher grades

Standing Liberty Quarters

By
Keith N. Kelman and Richard Bagg

"The entire series of "Liberty Standing" quarters is difficult to get well struck up. The head is usually rather indefinite."

Standard Catalogue, 1943

Recently, increasing prices have signified strong twentieth century coin collector demand for Buffalo nickels with full strikes, Mercury dimes with full bands, Standing Liberty Quarters with full heads and Walking Liberty halves with full skirt lines. The scarcity of these specimens is evident through a careful study of the Coin Dealer Newsletter which has shown substantial price increases for several of these series. Our review focuses on the Standing Liberty Quarter series with particular attention to the "full head" classification.

It has been commonly known for many decades that Standing Liberty quarters are very scarce when found with the head detail fully evident. In fact, the Red Book's third edition published in 1948 noted that full headed specimens were "worth up to fifty percent above prices listed."

The definition of "full head" is reprinted from Standing Liberty Quarters (1st Edition):

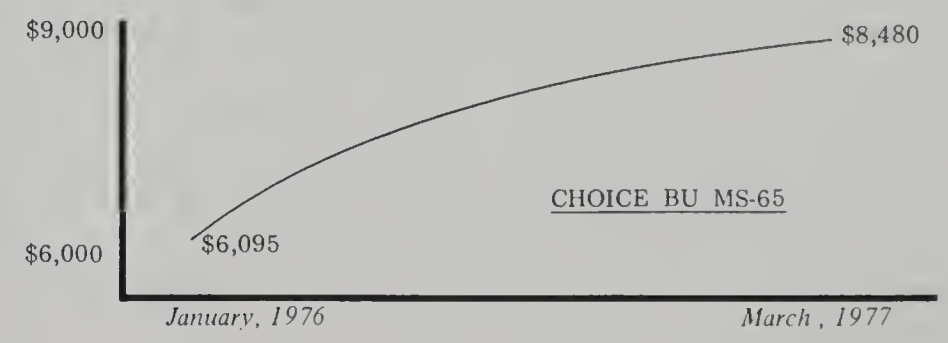

There are three factors which must be present before a Standing Liberty quarter can qualify as "full head".

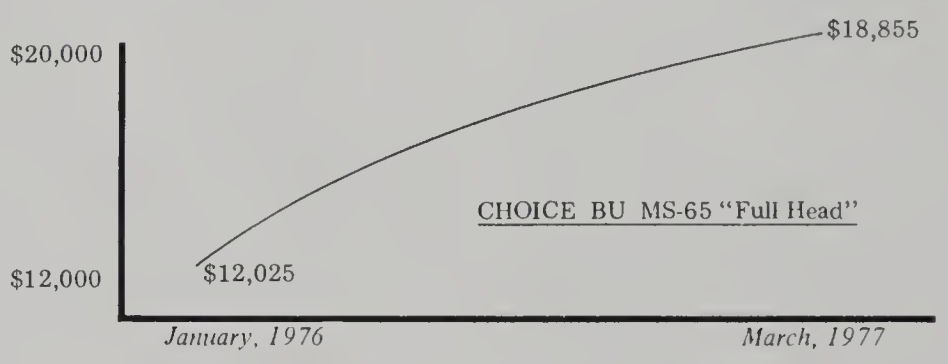

1. Three leaves or sprigs (though they look more like feathers) must be at least 95% visible in Liberty's hair.
2. The hairline along Liberty's brow and across her face must be complete.
3. A small indentation or hole (which on a few dates appears as a slash mark), must be evident at the position of Liberty's ear.

This definition only applies to Type II quarters (1917 - 1930). Type I quarters (1916 - 1917) have different head detail and are usually encountered with well struck up heads. The 1917 dies were improved from the 1916 dies. Thus, 1916 heads usually appear with less detail than the 1917's.

Our analysis of the market has indicated that both dealers' bids as currently listed in the "Grey Sheet" and recent auction activity show a growing demand for Standing Liberty quarters over the last year.

An analysis of the Coin Dealer Newsletter shows substantial price increases for the complete sets without the overdate in both MS-65 and MS-65 "full head". The Grey Sheet first listed Standing Liberty quarters by date in January of 1976. The MS-65 set has increased in value 39% over this 15 month period. The "full head" set increased by 57% based on dealer bids over the same period. An MS-65 overdate has been bid up 85% since January of 1976 while its "full head" counterpart's bid has doubled to $13,000. No true MS-65's have changed hands to our knowledge since the Grey Sheet's first listing! The graphs below depict the price rise for MS-65 and MS-65 "full head" sets (without the overdate).

Our graphs indicate that collectors are willing to pay double (and, on some dates, triple) the non-"full head" bid for all dates!

Recent auction offerings also substantiate the graphic representation of price increases. The Stack's "Reed Hawn" auction (March 11 & 12, 1977) contained several elusive uncirculated Standing Liberty quarter dates which realized the following prices:

1916		$2300	1923-S		$925
1917 (I)		420	1924	FH	400
1917-S (I)		540	1925	FH	330
1918	FH	400	1927-D	FH	450
1920-D	FH	600	1928-D	FH	900

A perusal of the Grey Sheet's MONTHLY SUMMARY will show that the collectors and dealers who purchased these coins were paying prices substantially higher than dealer bids in virtually all cases.

An analysis of individual dates shows dramatic price increases for many of the dates. Price increases are from January, 1976, to March, 1977 for Coin Dealer Newsletter bids.

	MS-65	MS-65		MS-65	MS-65
1916	78%	44%	1923-S	36%	89%
1917 (I)	5%	23%	1924	28%	46%
1917-D	9%	30%	1924-D	26%	74%
1917-S	12%	35%	1924-S	22%	45%
1917 (II)	15%	46%	1925	26%	31%
1917-D	23%	54%	1926	26%	35%
1917-S	0%	52%	1926-D	26%	35%
1918	9%	43%	1926-S	25%	33%
1918-D	27%	63%	1927	26%	37%
1918/17-S	85%	100%	1927-D	9%	37%
1918-S	17%	50%	1927-S	100%	110%
1919	20%	38%	1928	26%	33%
1919-D	31%	93%	1928-D	37%	120%
1919-S	42%	91%	1928-S	26%	39%
1920	28%	35%	1929	26%	31%
1920-D	23%	50%	1929-D	37%	67%
1920-S	17%	67%	1929-S	26%	28%
1921	22%	27%	1930	26%	31%
1923	28%	41%	1930-S	26%	37%

Though dealer bids have increased substantially over the last year, many of the dates have remained almost unobtainable in these ultimate conditions! "Full head" Type II mintmarked dates prior to 1929 remain extremely elusive. In fact, the only "full head" Type II dates which can be obtained with any regularity are 1929-S and 1930-P. (The 1930 has long been considered the most available Type II "full head" quarter.) Last year a quantity (twelve rolls) of 1929-S's were offered on the market; though most weren't, several of those coins did qualify as "full heads".

"Full head" 1930-S's---once believed to be unobtainable—can now be located occasionally.

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis and the MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas covered on a monthly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the CDN publications make them a very accurate reflection of the market.

INVESTORS NOTE: the prices in the CDN publications are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

SUBSCRIPTION INFORMATION: The MONTHLY SUMMARY and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge!

A subscription to the weekly COIN DEALER NEWSLETTER is: $11.75 for three months, $40.00 for one year and $70.00 for two years. A subscription to the MONTHLY SUMMARY and Complete Series Pricing Guide alone is: $15.00 for one year and $25.00 for two years.

STANDING LIBERTY QUARTERS *(Continued from page one)*

Comments on Type II Standing Liberty Quarters

Philadelphia Issues:

MS-65: The 1916 is by far the rarest MS-65 Philadelphia issue. The only other "P" mint coin that can be categorized as rare is the 1921---which often comes well struck. It has long been considered one of the semi-keys of the series.

MS-65 FH: Of the Type II "full head" Standing quarters, the least available on the market today in order are the 1921, 1923, and 1928.

Denver Issues:

MS-65 Rarity order:

1.	1919-D	5.	1927-D
2.	1918-D	6.	1928-D
3.	1917-D, 1920-D	7.	1924-D
4.	1929-D	8.	1926-D

MS-65 FH: All of the Denver mint issues are extremely difficult to locate with "full heads". The 1919 is the rarest.

San Francisco Issues:

MS-65: The 1918/17-S is, of course, by far the rarest of all the Standing quarters. The approximate rarity ranking of the other S-mints in MS-65 condition are:

1.	1927-S	5.	1917-S, 1918-S, 1923-S
2.	1919-S	6.	1924-S, 1930-S
3.	1926-S	7.	1928-S
4.	1920-S	8.	1929-S

MS-65 FH: Rarity orders:

1. 1918/17-S
2. 1919-S, 1927-S
3. 1918-S, 1920-S, 1926-S
4. 1917-S, 1923-S, 1924-S
5. 1930-S
6. 1928-S
7. 1929-S

Complete information on specific characteristics of individual dates will be available in Standing Liberty Quarters: An in Depth Analysis (Second revised edition), due for publication in the late summer of 1977.

Keith N. Kelman has studied Standing Liberty Quarters for years and has recently authored a book on the subject which sold several thousand copies. He is now working on the second edition of the book which will contain much new information on the series. Keith is a member of most numismatic associations.

Richard Bagg has had the opportunity to view and study rarities of all denominations and metals while working as a numismatic researcher for an internationally known coin firm. Rick is currently working on two books and several articles soon to be published, and is a life member of the American Numismatic Association and numerous other professional numismatic organizations.

LINCOLN CENTS

A SERIES TO WATCH

Recent auction results have shown a continuation---even an acceleration---of interest in gem specimens of twentieth-century coinage. Exceptional coins in the Buffalo nickel, Mercury dime, Standing Liberty quarter and Walking Liberty half dollar series are setting new price records at auction after auction. Convention bourse table activity as well as teletype bidding continues to reflect unprecedented demand for "gems" as well. On the otherhand, pieces which fall into the less-than-gem category often are left far behind in the bidding war which ensues when the outstanding coin appears on the auction block. The occasional "gem" in a bourse cabinet is usually the first to go---even though the price tag may be double or triple the normal Guidebook listing.

One of the "coming" areas---a series which has yet to attract the strong attention of many dealers or collector/investors---is Lincoln cents. In checking major auction catalogs it is surprising how few feature "runs" of dates in this series. An occasional complete set is offered---usually accompanied by a rather general description which covers only a few of the keys. In other catalogs (and in many convention bourse offerings) these same few keys appear with some regularity---but so far little attention is being paid to most of the dates in this popular and widely collected series. However, within the past year or so it has become apparent to many collectors---and to some astute dealers---that truly "gem" early Lincolns are extremely difficult to locate! Recent teletype offers to pay "anything reasonable" for practically all early mintmarked issue in "strictly gem original condition" have failed noticeably.

Today's collector, of course, wants fully struck pieces with original color overall---without spots or other detracting marks or discolorations. Try to find even a few! This is the task which faces those dealers who are attempting to aid their clients' attempts to assemble gem sets. Not only are the few dates which carry the higher Guidebook listings eluding collectors and dealers---1914-D, 1921-S, 1923-S, 1924-D & S and 1926-S---but many if not most of the dates which list in the $25-$75 range are proving almost impossible to find in the ultimate condition.

The 1909-SVDB, of the way, is probably the easiest early mintmarked issue to locate in gem condition; the 1909-S and 1910-S may well be the second and third most easily available. But try to locate a truly gem 1911-D, 1912-D or S, 1914-S, 1915-S to name a few---or nearly any of the Denver and San Francisco coins in the 1916-1928 group! These dates face a number of problems. Poor preservation through the years, naturally, is one of the major ones---resulting in fingerprinting, spots and/or discolorations and unattractive splotchy toning. Then, beginning around 1917, the striking of most of the branch mint issues left much to be desired. Now even the rarely encountered "original roll" may well consist of fifty coins each with its own problem of one sort or another. It wouldn't be unheard of to examine a bank-wrapped roll and not find a single coin which could accurately be described as a gem! The complete sets which sometimes appear at auction invariably include coins of widely varying quality---but with few "gems" dated before 1929 (except, perhaps, for some of the P-mints). Such sets seldom appeal to collectors and are, therefore, usually sold to dealers at reasonable prices ---with the profit realized from the few choice and gem specimens when the set is later broken up. The remainder of the coins are often sold at healthy discounts from Guidebook levels.

It must be mentioned that a number of persons are "processing" early Lincolns to make them appear as original gem specimens. This is a rather exacting process and not too many pieces come out "just right". However, we have seen quite a number of specimens which only the most knowledgeable collector would be able to distinguish as not being original. Those who process these coins usually start with a well struck brown uncs---full MS-60 pieces---but, of course, there is no limitation against using "sliders" or simple AU coins either. The processed specimen which shows even the slightest wear is far easier to spot---yet many collectors have found to their chagrin that their "gem" is really a re-colored XF/AU coin! It is suggested that all serious collectors of Lincoln cents familiarize themselves with the characteristics of original coins---and the ways in which to tell the processed coin.

The CDN is planning an extensive date by date analysis of the pre-1934 Lincolns within the near future. Information is now being compiled and this thorough study of each issue should prove to be of considerable assistance to those who now collect Lincolns---or those who see the future possibilities in this long popular but still underrated and often misunderstood series.

Subscribers will remember that the CDN presented an in-depth look at the Two-cent series in the December issue of the MONTHLY SUMMARY. At that time it was mentioned that Mike Kliman, author of the CDN article, would soon publish a book on the subject. This seventy-page soft cover book---covering all known die varieties and including a price and value scale---is now available for $4 (which includes postage and handling). Orders should be sent to Numismatic Enterprises, P.O. Box 365, South Laguna, California 92677 (California residents must add six-percent sales tax.)

GOLD SERIES by date

Common date coins in the following listings were computed on a basis of gold bullion at $147.70 per ounce.

Gem MS-65+ specimens are worth more than the MS-65 prices listed below.

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.71 per ounce.

Earlier rolls average good; later rolls usually include higher grades

Prooflike

MORGAN DOLLARS

by DAVID HALL

EDITORS NOTE: *During the past several months the CDN has received numerous requests for information about prices for prooflike Morgan dollars. The following article by Mr. David Hall should prove extremely useful to the many collector/investors who are interested in this fast-growing and still relatively unexplored area of the market. To our knowledge, this is the first study of prooflike Morgans which includes actual price ranges for every date and mintmark in the entire series!*

As the market stands today, a weekly "bid-ask" column in the CDN is virtually out of the question due to several factors. Foremost among them is the fact that practically every dealer and silver dollar specialist has his own opinion as to the rarity and value of each individual issue; teletype as well as bourse table price tags are often at wide variance–even for specimens which are practically identical. For this reason, of course, there will also be differences of opinion as to where certain dates should or should not have been placed in the following study. Mr. Hall, however, has used his several years of in-depth silver dollar research along with consultation with a number of other well-known specialists in the field to present the following approximate wholesale price levels for fully prooflike MS-65 specimens. It will be stressed that gem MS-65+ "wonder" specimens command prices far in excess of those for MS-65 pieces–and several impressive examples will be cited. Since this fascinating and volatile area of prooflike dollars is certain to change–perhaps dramatically–in the coming months, the CDN plans to publish further "up-dates" as more information and sales records are compiled.

In the late 1950's, one of the country's major "mail order" dealers regularly picked up solid-date BU bags of S-mint Morgans at his San Francisco bank. He would remove the nicest prooflike specimens from these bags and then take the remaining coins back to his bank to deposit them at face value! Not only were the 1878-82 issues available, but he would often receive bags of such dates as 1885-S, 1890-S, 1891-S, 1897-S--and occasionally even other now quite scarce S-mints. Even though this dealer was one of the largest advertisers of silver dollars in the country at that time, silver dollars were so readily available that he would stock only the choice prooflike specimens of these and many other dates. And although his ads listed both BU and prooflike coins (at only slightly higher prices), customers received choice prooflikes no matter which one they ordered! Years later, in 1967, a local dealer had purchased several original bags of 1880-S's--and one of the bags contained nothing but choice cameo prooflike coins. I was interested in purchasing several rolls, but his price was two dollars per roll over the then current wholesale bid level of $29.50--and so I passed.

Well, as you know, in 1977 things have changed. Those of us who balked at paying ten cents more per coin for prooflikes ten years ago are now willing to pay double or triple "bid" for the common dates--and as much as ten times "bid" (or perhaps even more) for the really rare issues! Choice prooflike dollars are in great demand by an ever-increasing number of collector/specialists and their dealer-suppliers. Recent auction records for outstanding specimens have been amazing even the most knowledgeable and experienced dealers–and teletype bid levels for "strictly gem prooflikes" have been reaching some very impressive levels. (During the past few weeks, for example, dealers have offered to pay the following prices "for the right" prooflike coins: 1888-O $280, 1889-O $265, 1889-S $300, 1890-O $200, 1890-S $175, 1891-CC $300!)

As in all other areas of today's coin market, accurate grading of prooflike dollars is an extremely crucial consideration. Since deep mirror-surface pieces are becoming more and more difficult to locate, many dealers are now attempting (and often succeeding) to sell semi-prooflikes, "one-sided" prooflikes and even frosty BU pieces with clean bag mark free surfaces as the genuine article. Their rationale may well be--"what do you do when you have fifteen customers waiting for a choice prooflike 1893-P and you haven't even seen one for the past three years." Putting it simply, the demand is much greater than the supply of a great number of issues.

Very few attempts have been made to place actual price evaluations on prooflike dollars--this, to my knowledge, is the first one to be published which covers all dates in the Morgan series. As with any initial study, there is bound to be a reasonable amount of disagreement--with most silver dollar collector/specialists having their own "private" evaluations which have been compiled as a result of their own experience. The following price listings are current approximate wholesale ranges for MS-65 prooflike coins. Except for the rarities, pieces that are flatly struck or which exhibit obvious bag marks should sell at greatly reduced levels. (Bag marks on prooflike dollars, by the way, are far more noticeable than on frosty BU's.) In contrast, a "wonder" coin--one in the gem MS-65+ or approaching the MS-70 category--can bring just about any price imaginable. It must be stressed that the prices that follow are for deep mirror-surface dollars--not for semi or one-sided prooflikes. Also, proof-likes with frosty "cameo" devices sell for substantially more than those with dull or brilliant devices.

$10 to $20: 1879-S, 1880-S, 1881-O, 1881-S, 1882-O, 1882-S, 1883-O, 1884-O, 1885-P, 1885-O, 1886-P, 1887-P, 1888-O, 1898-O, 1904-O.

The 1879-S, 1880-S, 1887-P, and 1904-O are the most common prooflike Morgan dollars. Still, an outstanding 1880-S was sold to a dealer for $100 during the 1975 A.N.A. Convention–this aptly illustrates that in the field of prooflike dollars, individual coins in superb condition speak for themselves and cannot be categorized in any price listing.

$20 to $30: 1878-P(7TF), 1878-S, 1896-P, 1897-P, 1898-P, 1899-O, 1900-P, 1901-O, 1902-O.

The 1897-P is the scarcest date in this second group.

$30 to $50: 1878-P(8TF), 1878-CC, 1879-P, 1879-O, 1880-P, 1881-P, 1882-P, 1882-CC, 1883-P, 1883-CC, 1884-P, 1884-CC, 1888-P, 1889-P, 1890-P, 1900-O, 1903-P.

In this grouping 1883-P and 1888-P are the most easily located; the 1890-P is the scarcest.

$50 to $75: 1878-P(7/8TF), 1880-O, 1887-O, 1890-O, 1890-S, 1891-S 1897-S.

The 1880-O is the toughest New Orleans coin of this group; the 1890-S is the most elusive San Francisco issue. Another illustration of a superb specimen speaking for itself. about four years ago a dealer paid $500 for an incredible 1887-O–and he feels he could sell the coin for at least four times this figure today!

(Continued on page two)

AUCTION TRENDS

Gem coins at auction continue to command a great deal of attention--with collector and dealer "floor bidders" vying with strong "book bids" (mail bids sent in by those unable to attend) to regularly set new price records for outstanding material. It must be emphasized that in today's extremely quality-conscious market climate, those attending auctions have almost certainly scrutinized each and every coin in which they are interested--and that the prices realized often indicate that many floor bidders do not always agree with catalog descriptions. Occasionally, two coins of the same date and mint which carry identical descriptions will sell for prices with as much as a fifty percent variance. Obviously, those who have thoroughly examined the two coins beforehand have noticed something which was not mentioned in the catalog--perhaps a nick or scratch--a bit of over-grading--or perhaps even one of the less and less frequently encountered instances of under-grading! In any case, when collectors and/or dealers find an auction coin that truly fits into the "gem" category, all stops are generally pulled--and some incredible sale prices often result!

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis and the MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas covered on a monthly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the CDN publications make them a very accurate reflection of the market.

INVESTORS NOTE: the prices in the CDN publications are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

SUBSCRIPTION INFORMATION: The MONTHLY SUMMARY and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge!

A subscription to the weekly COIN DEALER NEWSLETTER is: $11.75 for three months, $40.00 for one year and $70.00 for two years. A subscription to the MONTHLY SUMMARY and Complete Series Pricing Guide alone is: $15.00 for one year and $25.00 for two years.

PROOFLIKE MORGAN DOLLARS

(Continued from page one)

$75 to $100: 1887-S, 1889-O, 1899-P, 1902-P, 1903-O.
Of the coins in this group, the 1903-O is the most frequently encountered. By the way, an 1889-O in "wonder" condition recently changed hands for $400!

$80 to $120: 1880-CC, 1881-CC, 1885-CC, 1885-S, 1890-CC, 1891-CC.
The 1881-CC and 1885-CC are more easily located than the other dates in this category.

$100 to $150: 1889-S, 1891-P, 1921-D.

$165 to $200: 1886-S, 1888-S, 1898-S, 1900-S.
The 1900-S is the scarcest of the four–even though a number of prooflike specimens were released last year as part of the famous "Redfield Hoard."

$250 to $350: 1892-P, 1892-CC, 1899-S.
The 1892-CC and 1899-S are the most plentiful–but, currently, they sell for more than the 1892-P.

$300 to $400: 1894-S

$350 to $450: 1902-S

$400 to $600: 1883-S

$500 to $1000: 1891-O, 1893-P, 1901-S, 1904-P, 1921-S.
Looking for a prooflike 1921-S can be compared to the search for a 1945-P Mercury dime with strictly "full bands." If offered at a major auction, a choice deep mirror-surface example would certainly bring a runaway price! Very few people can remember ever seeing a true prooflike 1891-O, 1893-P, or 1904-P; the 1901-S is one of the truly underrated prooflikes in the Morgan dollar series.

$750 to $1000: 1896-S, 1904-S.
Both of these are very rare with deep mirror-surface.

$1000 to $1500: 1879-CC, 1886-O, 1893-CC, 1896-O, 1897-O.
The 1879-CC and 1893-CC Morgans are expensive in MS-65 condition, but they are not particularly rare in prooflike condition. The 1886-O, 1896-O and 1897-O are true prooflike rarities. (There have been two recent sales of prooflike 1886-O's–an MS-65 at $1500 and an incredible MS-65+ which was sold to a dealer for over $2000!)

$1700 to $2200: 1895-S
Expensive in full MS-65–but not really rare in prooflike condition.

$2000 to $3000: 1892-O, 1893-O, 1894-P, 1894-O, 1903-S.
This is where value and subsequent price listing become quite controversial. These five issues appear on the market so infrequently that any talk of relative rarity becomes pure speculation based upon the experience of those involved in the discussion.

$3500 to $4500: 1889-CC
This is certainly a rare coin–but if you locate an MS-65 specimen the chances are about one in three that it will be a prooflike.

$5000 plus: 1884-S, 1895-O, 1901-P.

I have never personally seen a prooflike 1884-S, but a dealer whose word I greatly respect told me that one sold four or five years ago for $2500! Recently a frosty MS-65+ specimen changed hands (between dealers) for $5000. Prooflike or frosty MS-65, the 1884-S is one of the great rarities in the Morgan dollar series. A fairly deep mirror-surface 1895-O which appeared to have been cleaned at one time recently was sold (again, to a dealer) at around $5000–it is the only prooflike 1895-O that I can recall seeing! There are two prooflike 1901-P's known. One is the "Bruce Todd Sale" specimen (which has a gash on the head) and the other, which was sold before the Bruce Todd coin was purchased, is now somewhere in collector hands.

$12,000 to $15,000: 1892-S
A very rare coin, of course–but, again, not relatively rare in prooflike condition.

???: 1893-S.
Prooflike rarity across the entire Morgan series is, at this point in time, a matter of opinion and personal experience. No two lists of prooflike rarities will read the same. There is, however, one thing on which all the experts agree–no one has ever seen a fully prooflike 1893-S. The coin, on the other-hand, is so rare in strict MS-65 condition that a prooflike specimen might not bring a significant premium over the current price range for a true MS-65 piece....but, then again, since such a coin has yet to appear at auction, anything might happen in the ensuing excitement!

AUCTION TRENDS

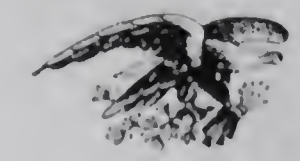

(Continued from page one)

The just concluded Bowers and Ruddy Galleries auction of the "Getty Collection" (May 5 - 6) numbered among its lots a nearly complete BU set of Standing Liberty quarters--with a majority of the pieces being of the "full head" striking. Since the April issue of the MONTHLY SUMMARY featured an extensive article on this series, it seems appropriate to list some of the prices just brought by several of the more impressive specimens. It should be noted that the following dates were missing from the set: 1916, 1920-S, 1924-S, 1926-D and 1928-D. Whether the the consigner never located these dates in the top grade desired or whether they were simply not consigned to the sale, we do not know. (The following descriptions are from the catalog.)

1917-S (I)	Gem Brilliant Uncirculated, full head	$ 560
1917-P (II)	Gem Brilliant Uncirculated, full head	$ 425
1917-D (II)	Choice Brilliant Uncirculated, full head	$ 450
1918-P	Gem Brilliant Uncirculated, 75% head	$ 180
1918-S	Brilliant Uncirculated, full head	$ 525
1919-P	Choice Brilliant Uncirculated, full head	$ 350
1919-D	Choice Brilliant Uncirculated, full head	$1375
1920-D	Choice Brilliant Uncirculated, full head	$ 550
1923-S	Gem Brilliant Uncirculated, full head	$1250
1924-D	Gem Brilliant Uncirculated, full head	$1050
1926-S	Gem Brilliant Uncirculated, 85% head	$ 380
1927-D	Gem Brilliant Uncirculated, full head	$ 450
1927-S	Gem Brilliant Uncirculated, 85% head	$2200
1928-P	Gem Brilliant Uncirculated, full head	$ 450
1929-D	Choice Brilliant Uncirculated, full head	$ 725
1929-S	Gem Brilliant Uncirculated, full head	$ 375
1930-P	Gem Brilliant Uncirculated, full head	$ 320
1930-S	Gem Brilliant Uncirculated, full head	$ 430

Needless to say, the beautiful Standing Liberty quarter series is finally "coming into its own." This is particularly clear when an issue such as 1928-P–until very recently considered a "common date"–brings $450! And when the rare 1927-S without a "full head" is knocked down to the winning bidder at $2200!

Space doesn't permit a thorough examination of the many other interesting prices realized at this latest "B & R" auction, but here are a couple of "common date" coins which were represented in an uncommon "gem" condition–and which sold accordingly. A 1929-D Buffalo nickel was offered–and it carried the following description: 'Gem Brilliant Uncirculated. Needle-sharp strike. Outstanding!"–the top bidder paid what must be a record-breaking $170! A "very sharply struck gem BU" 1935-D nickel changed ownership for a rather substantial $100! And a 1910 ten-dollar gold piece–again a "Gem Brilliant Uncirculated with a needle-sharp strike"–sold for $850!

GOLD SERIES by date

Common date coins in the following listings were computed on a basis of gold bullion at $147.60 per ounce.

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.73 per ounce.

Earlier rolls average good, later rolls usually include higher grades

United States GOLD TYPE COINS

by Joel Gabrelow

EDITORS NOTE: During the past few months the CDN has received numerous requests for information about U.S. gold type coins. With this issue of the MONTHLY SUMMARY we are pleased to present the following in-depth examination of the subject by Mr. Joel Gabrelow. Joel has studied the market activity of choice quality U.S. gold for the past several years and during this time has handled many scarce and rare coins seldom seen by most dealers. We hope that this study will answer many of the questions which have been voiced by CDN readers!

Dated gold coins are no longer in the limelight. Prices for rare date gold coinage have dropped from their peak levels seen in 1974 and it appears that only a handful of specialists are concentrating on this segment of the U.S. gold market.

On the other hand, the demand for U.S. type gold in choice MS-65 quality has quietly increased in popularity. With the demand for MS-65 copper and silver type coins so great recently, it is only natural for gold type coins to follow in the same footsteps. Many new collectors are incorporating gold into their regular collections. Again, this is evidenced by increasing price realizations for quality pieces in auction as well as a higher volume of requests for coins on the retail level.

Looking back over the past few years, the "bid-ask" levels for choice MS-65 type gold appear rather static. But this appearance is deceptive. A close examination will reveal numerous gains in many of the types; these gains were small--but they continued to occur month in and month out. While this area of the market lacks much of the fervor found in other areas (consider commemoratives, for example) it has remained consistent and stable. The stability of quality type gold can be attributed to the fact that the majority of dealers in our country have yet to penetrate the gold market--with the exception of bullion items.

Counterfeiting and overgrading continue to discourage many dealers from stocking gold. Counterfeits are difficult for the average dealer to detect because of his inability to view a large enough quantity at one time to establish a comparison. The same situation exists for grading. Overgrading usually stems from lack of experience. Choice quality type gold is truly scarce and only a select group of dealers are ever able to examine more than an occasional piece or two.

Consider the quantity of choice type gold at a major convention consisting of 150 bourse dealers. Of the 150, how many stock U.S. type gold? 5? 10? 20? Optimistically, let us say 20 stock gold. Now, of the 20, what percentage of them have MS-65 material? Maybe only two or three have truly MS-65 material! Most of what you will see will be overgraded. Overgrading on the dealer's part is usually not a malicious intention--but rather it is a lack of his ability to ever see what real MS-65 coins look like!

Choice MS-65 gold pieces--when graded properly--are beautiful coins. THEY ARE NOT PERFECT HOWEVER. A perfect coin would be graded as a MS-65+ or MS-70--and would be called gem. I personally have never seen a MS-70 gold coin in the higher denominations. Gem coins will bring tremendous prices--often tripling current levels ("bid-ask"). A MS-65 coin will possess minor nicks or flaws. As the size of the coin decreases, so should the quantities of imperfections. When comparing normal MS-60 coins to true MS-65's, the differences will be outstanding. Many coins fall into the "in-between" category. Where great price disparities exist, as in the Type II One Dollar, a coin in-between grades should be carefully considered. Full MS-65 specimens of this type are extremely rare, so most of the pieces offered are MS-60's and MS-60+'s. These pieces should be acquired at a level near the MS-60 category. Margins of profit are greatly increased by unscrupulous dealers on in-between grade coins, so protect yourself and try to acquire the coin at a price near MS-60. Because you will not always have the opportunity to compare pieces, be sure that the individual you are working with is realiable and experience.

Now for an examination of the types:

TYPE I ONE DOLLAR:

Very common in MS-60 and not recommended. Nice MS-60+ pieces sell for $300 and up. MS-65's are available and sell in the "bid-ask" range between dealers. Surfaces come either satin or prooflike--with the 1853 being most common. The prooflikes will bring more. A MS-65 coin in any one dollar type will have virtually no imperfections.

TYPE II ONE DOLLAR:

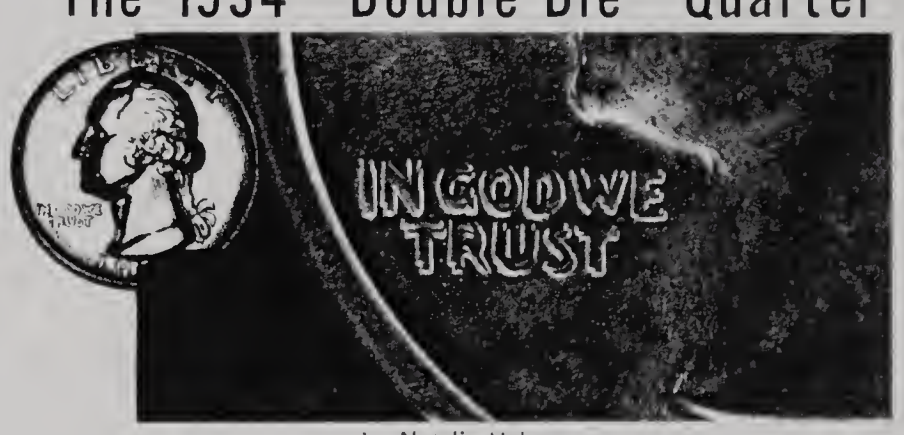

A multitude of A.U. specimens are being sold as MS-60's; great caution should be exercised here when seeking a Type II for your set. The majority of the Type II's offered to me are graded as MS-65 and usually priced midway between the MS-60 ask and the MS-65 bid--yet they grade MS-60+ at best (most are only MS-60's). A type II offered to you at less than $2000 and said to be MS-65 is a offering I would double cheek! True MS-65's sell for at least MS-65 bid of $2700. Nicer pieces usually sell for more. Exceptional MS-65+ specimens are rare--and what may seem unreasonable now will prove to be reasonable later on. Again, use extra caution when buying a Type II. Patience---and your willingness to learn--can save you hundreds of dollars in the long run.

TYPE III ONE DOLLAR:

Type III is the most common gold dollar in choice condition. Just last year quantities were available in both choice and gem (MS-65 and MS-65+) at normal levels. In a short time, however, this supply has dried up considerably. Although still rather easily located, this coin is an excellent buy at today's levels. Dates most common in higher grades are 1862, 1874, 1888 and 1889.

The 1934 "Double Die" Quarter

by Natalie Halpern

Mention "doubled die" to most collectors and dealers and they immediately think of the 1955 Lincoln cent....but mention "doubled die" to an errorist or variety specialist and the Washington quarter series immediately comes to mind as one of the more prolific in pronounced "doubled dies." Our subject here is the 1934 "doubled die" quarter, a coin that has been popular with collectors for many years.

Briefly, the cause of a major "doubled die" is a misalignment (in this case a slight rotation) of the hub and die in the final stage of the die making process, resulting in two distinct impressions on the die. This type of error is most likely to occur during a year of increased production or when there are changes in the hub design.

The average life of a quarter die during the silver coinage era was approximately 500,000 coins. In 1934 the total mintage of Washington quarters was approximately 35.5 million coins, as compared to about 6.2 million in 1932. There was an additional factor of a change in master hubs, which were used to produce the working hubs. A quick check of your 1932 and 1934 quarters will indicate the most important change. The motto "IN GOD WE TRUST" on all of the 1932 coins is in extremely shallow relief, while for most of the 1934 specimens a new hub was used to give a greater relief.

At least one working die dated 1934 and with the shallow relief was used at the Philadelphia Mint. This coin is referred to as the Type I "Light Motto" and is uncommon, especially in uncirculated condition. Two other hub types were used and are most evident by the following features: Type II, thin, high relief motto, date and "LIBERTY," middle stroke of "W" in "WE" is below the sides of the letter. Type III, wide, high relief motto, date and "LIBERTY," middle stroke of "W" is above both sides of the letter. Of the three types, Type I is the most uncommon, followed by Type III, while Type II is very common. Type I is found on Philadelphia Mint coins of 1934, while Types II and III are found on Philadelphia and Denver Mint coins.

In 1934 a total of about 70 obverse working dies were made. Indications are that no more than one obverse die was used to produce the Type I "Light Motto" coins. Probably three to eight dies were used to produce the Type III coins and probably 60 to 65 obverse dies of Type II. These figures were arrived at after extensive research and are the result of the relative availability of the three Types.

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis and the MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas covered on a monthly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the CDN publications make them a very accurate reflection of the market.

INVESTORS NOTE: the prices in the CDN publications are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

SUBSCRIPTION INFORMATION: The MONTHLY SUMMARY and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge!

A subscription to the weekly COIN DEALER NEWSLETTER is: $11.75 for three months, $40.00 for one year and $70.00 for two years. A subscription to the MONTHLY SUMMARY and Complete Series Pricing Guide alone is: $15.00 for one year and $25.00 for two years.

UNITED STATES GOLD TYPE COINS *(continued from page one)*

$2½ AND $5 CLASSIC HEAD; $3 GOLD PIECE:

It is difficult to establish a rule of thumb on these denominations. Because choice and gem specimens appear so infrequently, each coin stands on its own merit. The reason for this is that strikings varied so greatly. This is an area where huge price disparities exist in grades between MS-60 and MS-65. There are very few coins to compare with on today's market. How many choice or gem quality Classic Heads and Threes have you seen lately? When purchasing coins in this group, I emphasize again the importance of dealing with an experienced individual--someone who has seen and handled these coins frequently.

$2½, $5 AND $10 LIBERTY:

The $2½ is the easiest to locate in the higher grades. The $5 and $10 are more difficult--with the $10 the toughest of the three. In the $2½ series, gems are available--but they still will require some searching in order to find the best one for you. The dates most commonly found in gem quality are the 1903, 1905 and 1907. Most of the ones I've handled are satin surfaced. In fact, the majority of them come this way. Some of the "S" mintmarks, however, come with prooflike surfaces--but they are often less attractive, for, (like Morgan Dollars in prooflike condition) a mirror surface will set off surface friction. Clean surface prooflikes are scarce and worth a premium. All quality $2½'s are presently undervalued.

$5 Liberty's are very tough to acquire in gem quality. In fact, I have seen only one piece that truly fits this description--and it was not perfect. $5 pieces in the choice MS-65 grade are available and are priced very reasonably. Dates available in choice condition vary and include many of the "S" mintmarks of the 1880's. Some are proof-like while others are of the satin variety. Again, coins in the choice MS-65 group will not be perfect and will more than likely show a few abrasions and marks. Waiting for the perfect $5 will prove futile. Do not hesitate to buy a coin that is approaching gem quality as they will always be in great demand. And in addition, these coins are undervalued.

$10 Liberty's are extremely rare in MS-65+ to MS-70 condition. Coins that approach gem mint state include the 1901 and the 1901-S. Either type surface is available; personal taste will dictate your selection. On the larger denominations, a certain pride-to-grade ratio exists---the fewer the bagmarks the higher the price. I strongly suggest acquiring the attractive specimens while still available. Much like the $5, waiting for the perfect piece could mean waiting forever. Buy the choice coins today--they will always be in demand.

"NO MOTTO" $5 AND $10 LIBERTY:

Pieces in this group are seldom seen in choice or gem quality. They usually attract the attention of the specialist when available. Caution is the keynote when attempting to purchase these coins.

$2½, $5 AND $10 INDIANS:

Any denomination Indian gold coin in fully struck choice or gem quality is scarce. In the $2½ series, the most commonly found date in gem quality is the 1925-D. Gem MS-65+ specimens will show a wire rim in some cases and exceptionally clean surfaces. Usually, however, the cheek bone will show some evidence of stacking. Pieces lacking stack markes on the cheek bone are extremely difficult to locate. Several of the later "P" mints are also obtainable in high quality grades. Pay close attention to the surfaces of the $2½ and $5 pieces. Good lustre and mark free surfaces on these two pieces is a scarce combination and when found should be purchased. Remember, perfect coins in these series are very tough--if not impossible--and coins that are close to gem quality are excellent investments and good values at today's levels.

The $10 Indian is easier to locate in gem MS-65+ to MS-70 than its two smaller counterparts (the reverse holds true in the Liberty series). The majority of the legitimate MS-65 choice coins offered today are pieces that have excellent fields on both obverse and reverse--yet they will usually have a light hairline or some minor problem, such as a small nick on the cheek and face area. The perfect coin, although difficult to obtain, can be bought. When available, they are sold at fantastic premiums over the choice MS-65 price. A recent example of this is the 1910-P which sold in the Bowers and Ruddy auction last month at $850. Dates most commonly seen in choice and gem quality (in order of scarcity) are 1932, 1926--then 1910-P, 1911-P, 1913-P, 1912-P, 1915-P and 1914-P. Prices for the choice MS-65 coins range from $350 to $600.

$20 LIBERTY AND SAINT GAUDENS:

The two earlier types of $20 Liberty are scarce in choice quality. They are not the most popular coins with general gold type collectors. Consequently, these types are sold to the specialist, usually for date sets. The Type III (1877 through 1907) is the type ordinarily found in a type set. They are still modestly priced in choice quality, and they are readily available. Gem specimens are not rare and can be found from time to time. Usually, the 1904-P is the date seen in the highest grades. The "S" mints of the 1890's and 1900's are frequently seen with prooflike surfaces, unfortunately, as with many other gold coins found with prooflike surfaces, they lack the attractiveness of the satin pieces because of the apparent field friction. Gem specimens will bring at least 25% more than listed "bid-ask" levels for choice MS-65 specimens.

Type gold in the quality grades will continue to become more and more scarce. Most of the individuals who are investing in gold today are able to hold on for the long term (3 years and longer). The majority of these individuals seem to have an excellent understanding of this market and a reflection of this is their recognition of the power of long term investment. Another consideration is that many collectors and investors enjoy the gold coins they purchase because gold is not only a precious metal but also because the coins are beautiful pieces of artwork that can be appreciated for years. U.S. gold coins have features that other coins lack; those who are able to see these added features will take advantage of the many opportunities in this relatively untouched field.

It will come as no surprise to see quality gold rise in value. As inflation continues to grow, a greater influx of new investors enters the gold market to protect their dollars. While bullion items and the actual price of gold have little to do with the values of rare type gold, it seems that percentage of the bullion investors eventually take an interest in numismatics. And U.S. gold provides them with the bullion as security as well as numismatics for pleasure.

Remember, always deal with an individual who understands the market and knows gold--this will be instrumental to your success in this field. Many thanks to Fred Malone of West Coast Coin Investors for his helpful information used in preparing this article. Fred is an experienced gold dealer and has handled virtually every rarity. And thanks also, to Fred Weinberg for his patience in reading over the rough draft--and adding in a few points.

THE 1934 "DOUBLE DIE" QUARTER *(contined from page one)*

There are two different doubled dies of the Type II obverse die. The most prominent of the two is commonly referred to as the Type IV, double shift motto, a description given by F.G. Spadone, author of "Major Variety-Oddity Guide of United States Coins." This reference is slightly misleading and the coin cannot truthfully be referred to as a "Type" but is accurately a "die variety." In this study, therefore, the two different doubled dies will be referred to as Variety I and Variety II.

On the 1934 Variety I "doubled die" Washington quarter, the doubling is most prominent on the motto but also easily seen on the date and "LIBERTY." One of the reasons this coin has been such a popular collectable is because the doubling can be seen in all grades including AG. Approximately 300 pieces are known in circulated condition.

Perhaps the most challenging aspect of this coin is its rarity in true Mint State. It is doubtful that this particular die had a full production run of 500,000 coins. Apparently very early in the production the doubling was noticed and attempts were made to polish the evidence off the die, which would account for the rarity of the early strike coins in existence today. Though most of the polishing was carefully done, there are obvious die scratches from the knot of Washington's pigtail across the base of the neck. Much of the doubling in the date and "LIBERTY" are somewhat muddled as a result of this polishing as well, and because of this quite often these coins are misgraded. It is not uncommon for a "technically uncirculated" coin to be graded anywhere from XF to AU because of the lack of detail. This author has seen about 15 to 20 truly uncirculated specimens, some of which had been downgraded by the owners.

The early die state of this "doubled die" (before the die polishing and resultant die scratches) would have to be called "extremely rare" in all grades, particularly Mint State, due to the previously mentioned circumstances. I have only seen three though I have heard of a few others. One was a true gem and is in a private collection. Another was a VF which I sold to a customer who walked away swearing it was an AU because he had never seen an early die state specimen before. The third is a Choice BU, just a few bag marks away from Mint State, now consigned to the 1977 ANA Auction sale.

The 1934 Variety II "doubled die" is quite minor in comparison to the Variety I. Only slight doubling is seen in the motto and in "LIBERTY" and no evidence of doubling in the date. It is probably much rarer than the Variety I "doubled die" since it is more difficult to identify in grades below VF. While rarer, it is not as sought after by collectors as the Variety I.

The price structure on the 1934 Variety I "doubled die" has remained fairly uniform over the past years which is surprising for a coin that is not listed in Redbook. AG $10, G $15, VG $20, Fine $30, VF $45, XF $75, UNC $150, BU $250. Prices for the early struck Variety I should be 20 to 25% higher in grades VF or better, except in MS-65 where it will be up to the knowledgeable numismatist to set the price should the coin come on the market.

Prices for the Variety II "doubled die" are $15 to $25 in circulated grades, UNC $35 and BU $50.

Other prominent "doubled dies" in the Washington quarter series include the 1942-D, 1943-P, 1943-S and 1944-S, although many others are recorded up to and including the 1976-D Bicentennial quarter.

Credit for most of the technical data quoted in this article goes to my co-researcher on "doubled dies," Gordon Harnack of Texas. Readers are referred to the excellent monograph by Harnack "Reimpressed Dies (Double Dies), Washington Quarters," which appeared in the February 1968 Numismatic Scrapbook Magazine.

GOLD SERIES by date

Common date coins in the following listings were computed on a basis of gold bullion at $141.80 per ounce.

Gem MS-65+ specimens are worth more than the MS-65 prices listed below

$2½ INDIAN HEAD

	XF/AU BID	XF/AU ASK	UNC (MS-60) BID	UNC (MS-60) ASK	Ch. BU (MS-65) BID	Ch. BU (MS-65) ASK

CIRCULATED ROLLS

The more common deta silver rolls were computed on a basis of silver bullion at $4.43 per ounce.

Earlier rolls average good, later rolls usually include higher grades.

AND COMPLETE SERIES PRICING GUIDE

JULY – 1977

Vol. II No. 7 Single copy price: $2.00

Liberty Seated QUARTERS

PART ONE 1838 - 1866

by Kamal M. Ahwash

EDITORS NOTE: It is with pleasure that the CDN presents the first of a two-part article and pricing guide for the Liberty Seated Quarter series. This study is authored by Mr. Kamal Ahwash---one of the country's foremost authorities on Liberty Seated material. This is the exclusive printing of Mr. Ahwash's pricing recommendations for the 1978 "Guidebook of U.S. Coins" and includes a number of important (and relatively unknown) varieties which have not previously been listed in major pricing guides. It must be remembered that, as "Redbook" recommendations, these prices are not dealer-to-dealer "bid-ask" prices. The second part of the article will appear in the August issue of the MONTHLY SUMMARY and will cover all dates and varieties in the 1866-91 "with motto" group.

During the past several years there have been a number of large collections of Liberty Seated Quarters that have come to the auction block---and, as a result, numerous rarities were exposed for the first time in many, many years. There are dates in this series that are unknown in uncirculated condition and others of which only one or two uncirculated specimens are known. There are, in addition, many varieties in this series that are unknown to the average collector and that are extremely rare---not only in unc., but in almost any grade. Why many virtually "common" varieties in other series appear in various pricing guides (including the "Redbook") and yet many scarce and rare Liberty Seated quarter varieties are omitted is a mystery to me! Listed in other series (particularly Bust half dollars) are numerous rather insignificant varieties such as large and small O's in a date or large or small letters in a motto---and with no price difference listed for these varieties. Yet omitted completely are such Liberty Seated quarter varieties as the 1843-O "large O" (two known in unc.), the 1843-O "small O" (again, two known in unc.), the 1856 large S/small S, the 1876-CC "fine reading" (no less than R-6) and numerous others. Or, even worse, several scarce and rare pieces are listed and priced as "common dates". Example: For an 1843-O (either size) I'd gladly pay double "Redbook" or Coin World "Trends" in unc!

I hope this article will open the eyes of and/or inform the many collectors of Liberty Seated quarters as to some of the rare varieties in this very popular series. Once again, I'd like to stress that these varieties are not new; they have been around and collected for years by knowledgeable numismatists. The prices often paid at auction give an excellent indication of their rarity! Granted, there have been no books yet written on Liberty Seated quarters---but there are always the catalogs of the great auction sales that one may purchase and that can be of great assistance to the collector and/or investor. A few of these are: World's Greatest Collection, Numismatic Gallery-1945; W.C. Atwater Collection, Max Mehl-1946; New Netherlands' 52nd, 54th and 57th Sales, Lester Merkin's October-1966, June-1968 and October-1969 Sales; Thomas Elder's Sale, the James A. Stack Sale (Stack's, 1975) and Stack's United States Coins, featuring the Reed Hawn Collection of U.S. Quarters - 1977. These are just a few of the major collections (there are many more) but these catalogs together with the prices realized will make an excellent beginning for the "budding specialist" or for the dealer or collector who would simply like to know the values of coins he might locate from one source or another.

Just a word about the prices which follow. These are the prices which I recommended to the publishers of the "Redbook" for the 1978 edition. A quick glance at this price chart will also reveal that I recommended inclusion of a number of varieties which, I feel, are at least as important (if not more so) as many of the varieties which are included for other series. Being recommended for inclusion in the "Redbook", of course, these prices reflect what I feel should be the current retail market value. These prices also reflect the value of carefully graded coins---no scratches, rust, weak strikes, dings, excessive bag marks, rim nicks, etc.---only normal wear and contact marks. Coins meeting any of the stated grades but having scratches or other detracting features should be listed according to the actual grade—but with mention made of the defect(s) and priced accordingly! Example: "VF/30; many scratches - $20" (not $35, or whatever). Prices for Unc.-60 coins are for strictly uncirculated pieces---no cabinet friction, rubbing, scrubbed or polished coins---but pieces that have some original mint luster or original toning and a minimum of handling marks.

Just one more word of caution to the collector: The coin that was originally weakly struck will most likely be weak all the way down the line to Good—showing normal wear from grade to grade. However, the coin that was well-struck originally should retain the normal sharpness through the step by step wear that occurs. A coin should not be upgraded on the infamous words "It's just a weak strike---that's the way they all come!" This phrase is used many times when a coin is VF and the dealer is trying to sell it as an XF. True, many dates did come weakly struck (i.e., almost all dates in the 1840s—especially the O-mints---the 1856-66-P's on the head and reverse left wing and also the CC's from 1870-1875. (Any of these dates in fully struck condition are indeed worth a premium).

(Price Guide On Page Two)

U.S. TYPE GOLD

PART TWO

by Joel Gabrelow

Since the original U.S. Type Gold article appeared in the June MONTHLY SUMMARY issue, Choice and Gem quality (MS-65 and MS-65+ respectively) gold type coins have been in strong demand. This demand in evident by examining recent auction records in addition to normal retail sales conducted by the rare coin dealers who also deal in quality gold.

One outstanding example in auction last month was a 1908 $5 Liberty, described as "Gem BU; a real jewel." This coin realized $400 in the Bowers and Ruddy Sale late in June. When considering the true scarcity of pristine $5 Liberties, $400 for the 1908 is not excessively high.

Earlier in June, the Stack's Auction Sale contained several nice pieces. In the $2½ series, an 1897 listed as a "Gem" brought $360; a 1907 also described as a "Gem" realized $250 and a 1909 (Indian) described as a "Gem with a superb strike" realized $280, all of these prices are well in excess of present bid-ask for MS-65 coins. A 1906-D $5 Liberty described as a "satin-like Gem" realized $280---again above the present levels.

The $2½, $5 and $10 denominations appear to be the center of the active gold market. The quieter, yet steady, $1 and $20 denominations should become active when a few superb specimens find their way into the market. When coins with exceptional qualities come into the market place, they have a tendency to help the entire series. A quiet area in the gold market is the $20 St. Gaudens. Because last month's article neglected the series, I have chosen to discuss the series in the balance of this article.

The discussion that will follow on the $20 Saint Gaudens will cover only the dates that will serve as type coins. This does not mean that a collector assembling a set is confined to selecting only a common date. However, it is a generally accepted practive among collectors of type to acquire the highest grade in a common date.

The most available dates are the 1928, 1927 and 1926. These are all available in Choice and Gem condition. The 1920 - 1925 group, while as common as the first group in MS-60 (average uncirculated, bullion quality), are scarcer in MS-65. The 1907 normal relief is very popular for type and they are usually available---but finding a decent strike is a problem. The 1908 NM, 1908 WM and 1910 are similar in scarcity to the 1920 - 1925 group, in the MS-65 grade. Next up the scarcity ladder in the Philadelphia dates are the 1911, 1913 and 1915. Choice and Gem examples of these dates are seldom found in gold inventories; they are undervalued at the present time. The 1909, 1912 and 1914 are the toughest "P" mints in the higher grades. Quality examples of these dates usually come up through auction sales.

If a Denver mint Saint Gaudens is desired for type, many sleepers exist. In average uncirculated grades, the 1908 WM and NM are about the same in availability. When seeking Choice and especially Gem quality in these dates, the 1908-D No Motto is more difficult to locate. I feel the following Denver coins are undervalued in Choice and Gem grades: 1910-D, 1911-D, 1913-D, 1914-D and 1923-D. Despite the hoards of 1923-D's that have surfaced over the years, it still remains to be one of the more difficult "D" mints to find in quality conditions.

The San Francisco dates used for type include the 1909-S, 1910-S, 1911-S, 1914-S, 1915-S and 1916-S. These dates are available in both Choice and Gem quality---with the exception of the 1910-S and 1916-S. The 1910-S comes weakly struck and the 1916-S seems to be plagued by bagmarks (more so than other dates). It should be noted that a rare 1908-S has recently entered the market. It probably ranks among the finest known and will more than likely trade hands at possibly double MS-65 Bid-Ask or more.

Whenever selecting gold type coins, keep in mind that gold is a soft metal and stacking marks are the general rule, especially on the larger, heavier coins. Flat areas (knees, nose and breast) are unavoidable on most $20 gold coins. Gold was shipped in $10,000 face bags, so you can imagine the weight hitting the coins whenever moved! Just be certain that the coins you purchase are attractive and, more importantly, genuine. Incidentally, proof-like surfaces on Saint Gaudens are about as rare as proof-like Peace Dollars! Time allocated toward locating a proof-like will prove futile. As stated in last month's article (and it seems that it can't be emphasized enough), BE SURE YOU ARE DEALING WITH SOMEONE WHO KNOWS U.S. GOLD WELL.

I wish to thank Fred Weinberg of Numismatics Ltd who provided much valuable information for this second article on U.S. gold

Liberty Seated QUARTERS

PART TWO 1866 - 1891

by Kamal M. Ahwash

In concluding this two-part study of Liberty Seated Quarters, I would again like to stress the importance of the relationship between price and grade. If the coin is properly graded by the standards outlined in the first section of this article, then the prices listed are, I feel, normal retail values. Of course, for many of the "newly discovered" varieties (at least, varieties not previously known by the general collector), the prices set forth are more or less an educated assumption of what I feel is the current value. There is an excellent chance that many of these varieties will prove to be even rarer than I assume now---and, naturally, prices levels will advance accordingly!

The reader will note that in the 1875-91 group both "Type I" and "Type II" reverses are listed. I will briefly explain the difference: the "Type I" reverse has the "TAT" in STATES so close that they appear to touch---and, also, the "RI" in AMERICA appears to touch; on the "Type II" reverse both the "TAT" and "RI" are quite separated. For some years both reverses are found---for others only one type has been located. There is room for a considerable amount of additional research in this area. (More information on these two types can be found in the "Gobrecht Journal"---Volume III, Issue 8, Page 17---"Centennial Quarters" by John McCloskey.)

There are many hidden rarities in this 1866-91 Seated Liberty Quarter group. For example, when one finds a very "common date" in superb condition---such as 1875, 1876 or 1877 with a fully struck reverse, a full head and body and especially with stars showing full radials. These are definitely premium coins! Surfaces, of course, are of equal importance---so when one locates a fully struck specimen with flawless surfaces---well, price is then certainly not the major concern!! And, yes, there are numerous "sleepers" in this group. One is the 1873 "no arrows"---either the "open 3" or "closed 3" (but especially the "closed 3"---with only four uncirculated pieces recorded and an approximate mintage of only 1000!). And then, there is the 1880 with the reverse of the 1873 "closed 3", die crack on the upper left shield! I could go on and on---but here is a start---so get out your glass and happy hunting!

(Price Guide On Page Two)

EDITOR'S NOTE: With the issue of the MONTHLY SUMMARY we conclude Mr. Kam Ahwash's excellent article on and pricing guide for the retail values of Liberty Seated Quarters. This pricing information is the most extensive ever published for the series---covering 155 dates and varieties (in contrast to the 112 listed in the latest "Redbook")! It should be noted that Kam has just released his 411-page book entitled "Encyclopedia of U.S. Liberty Seated Dimes, 1837-91". This extremely impressive numismatic work contains over 600 enlarged photographs, methods of attribution, rarity factors and an attached price guide for all dates and varieties. It is available for $35.00 postpaid and will be autographed if desired. To order send check, money order or Mastercharge number to Kamal M. Ahwash, P.O. Box 422, Media, Pa. 19063. (Write for prices on five or more copies.)

The 1944-D/S LINCOLN and 1949-D/S JEFFERSON

by Bill Fivaz, NLG

Two of the most interesting (and visable) dual mintmarks to be discovered in recent years are the very scarce---possibly even rare---1944-D over S Lincoln Cent and the 1949-D over S Jefferson Nickel.

Dual mintmarks, as opposed to doubled mintmarks, involve two separate and distinct letters---a D over an S, S over D, O over CC, etc. Doubled mintmarks, on the other hand, are characterized by a doubling of the same letter (D over D, S over S, etc.). It is important at the outset to remember that all mintmarks are punched into the dies at the Philadelphia Mint and then shipped to the appropriate branch mint as needed.

There are two generally accepted theories on how the dual mintmarks occurred---and in truth both may be valid. The first is that it was an intentional circumstance, prompted by the necessity to save dies which had already been punched with another letter. In these cases, there may or may not have been an effort to lap or polish off the original mintmark prior to punching in the second. These could properly be described as varieties, being intentional in nature.

The other hypothesis that undoubtedly occurred on some coins is that they were unintentionally created when a mint workman inadvertently picked up the wrong mintmark punch and struck the die which had been previously punched with another letter. This is understandable when we recall that the dies are annealed (heated) periodically during the mintmark application in a location removed from the punching area. Because these are unintentional in nature, they may be correctly referred to as errors.

The question always remains however, how do we know with certainty that any given dual mintmark was intentional---or unintentional? The simple answer is that we don't. For that reason then, errorists usually refer to dual mintmarks as "varieties", assuming that they are all intentional aberrations.

1944-D/S LINCOLN

1949-D/S JEFFERSON

The 1944-D over S Cent: There are two varieties of this dual mintmark, with the Variety 1 pictured here being by far the scarcer of the two. As you can see, the original "S" is very visable to the north of the "D" as well as on top of and within it. The Variety 2 is considerably less visable and therefore not as desirable as the strong Variety 1. It has the middle swing of the "S" within the opening of the "D" as well as protruding out to the left of the vertical stem. There is no evidence of the original "S" above the "D" whatsoever on the Variety 2.

The Variety 1 was first discovered by error dealer Mike Zimpfer in the summer of 1972 and in an article in his March '74 catalogue he states that only two BU and three circulated specimens had been found during the two ensuing years. To my knowledge only nine uncirculated examples and fewer than thirty circulated pieces have been uncovered as of this writing. The variety is listed in the Red Book this year (1978) for the first time.

Numismatic News printed an excellent feature on this coin in their July 30, 1974 issue (pg. 16), complete with high quality electron microscope photos supplied by California error specialist Lonesome John. Although the article mentioned that there were three varieties involved, only two have been confirmed by repunched mintmark expert Tom Miller from Maryland. The so-called "Variety 3" is actually a different die state of Variety 2, verified by a die crack on Lincoln's shoulder over the VDB on both.

What is their value? The Numismatic News article states that the first BU specimen sold for $700, with other examples bringing from $400 to $750---depending upon the grade. Lonesome John advertised an XF at $300 in his July '74 catalogue and a carbon-spotted BU sold in a recent Bowers & Ruddy auction (Feb. '77) for $460. Although these prices may seem a bit high, they are the only figures we can use as so few have appeared on the market. A Gem BU specimen will go under the hammer at this year's ANA auction---it will be most interesting to see at what level the final bidding will stop!

The 1949-D over S Nickel: Another recently discovered dual mintmark, this coin was first listed in the Guidebook in 1977. It was initially reported and pictured in Coin World's May 29, 1974 Collector's Clearinghouse, although it was not tagged definitely as a D/S at that time. A subsequent Coin World article dated March 3, 1976 specifically pinned it down as the dual mintmark---with an accompanying photo providing the conclusive evidence.

It is believed at this time that there is only one die involved on this variety. The photo shows the clear "S" atop and within the "D", very much like the aforementioned 1944-D/S. The major diagnostic features to look for are heavy polishing marks leading upward to the northeast from the top of the mintmark. These were evidently the result of a mint employee's attempt to lap off the "S" prior to punching in the "D".

Value? None have been sold to this writer's knowledge. As on the 1944-D/S Cent, very few uncirculated pieces are known, possibly only four or five. It is hoped that more will be uncovered as a result of this article and that a price level can be established. For the time being, I feel the rarity is commensurate to that of the 1944-D/S cent. If and when a specimen comes onto the market, either in a private sale or in an auction, the result should be very enlightening.

Dual mintmarks---maybe only a stepchild to overdates---but every bit as interesting! In all there are ten different ones known on our coinage, from cents to dollars. Two quarters, the 1950-D over S and the 1950-S over D are the newest members of this family and I have no doubt whatsoever that more are out there---on just about every denomination---waiting to be discovered. Which one will YOU find?

My thanks to Tom Miller for his valuable assistance in supplying information for this article and to Hoyt Warren for his excellent photographs of the coins.

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis and the MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas covered on a monthly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the CDN publications make them a very accurate reflection of the market.

INVESTORS NOTE: the prices in the CDN publications are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

SUBSCRIPTION INFORMATION: The MONTHLY SUMMARY and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge!

A subscription to the weekly COIN DEALER NEWSLETTER is: $11.75 for three months, $40.00 for one year and $70.00 for two years. A subscription to the MONTHLY SUMMARY and Complete Series Pricing Guide alone is: $15.00 for one year and $25.00 for two years.

The more common date silver rolls were computed on a basis of silver bullion at $4.54 per ounce.

CIRCULATED ROLLS

Earlier rolls average good; later rolls usually include higher grades.

Lincoln Cents

Relative Rarity and Value in Mint State 65+ Condition

by Mulford B. Simons, Jr.

EDITOR'S NOTE: As subscribers are aware, no bid-ask prices for choice MS-65 Lincoln cents are included in the page four price chart. The value of coins of this approximate quality are determined on an individual basis—with numerous factors such as strike, color, finger printing and/or spotting, planchet flaws entering the picture. Even "original bank-wrapped" rolls do not necessarily contain specimens which can truly be termed "choice" or "gem" due to one or more of the above mentioned problem areas. The CDN is pleased, therefore, to present the following look at the Lincoln series by Mulford B. Simons, Jr. Mr. Simons thoroughly describes the requirements for the gem MS-65+ category which is currently enjoying such a definite upswing in popularity. In addition, the price ranges listed for each date and mintmark very accurately reflect today's retail levels for coins of this ultimate quality. We feel that this article will be of considerable interest to the dealers, collectors and investors who are involved in the trading of the surprisingly scarce gem early Lincolns!

Back in 1963, when I entered numismatics professionally, Lincoln Cents were enjoying great popularity with collectors of the day. In fact, that demand for brilliant uncirculated Lincolns may be closely paralleled with the frantic activity in choice type coins experienced during the past three or four years. Interest gradually waned between 1964-65, largely due to over speculation and an abundance of scrubbed up and *simulated* Gem BU coins circulating widely in market channels. Since then, collector interest has remained quite stagnant. Only lately have numismatists realized the full *desirability* and *scarcity* of *truly choice* and *uncleaned* pre-1934 copper. This demand seems to be centered only around the choicest coins, however. The same quality consciousness has been evidenced among collectors seeking *full strike* Gem Buffalo Nickels, *split band* Mercuries, *full head* Standing Liberty Quarters, and *fully struck* Walking Liberty Half Dollars.

As a prerequisite to exploring the series in depth by date and mintmark, it is necessary to set forth *exactly what constitutes* a Gem BU (MS 65+) Lincoln Head Cent. For the purposes of this study, we shall use the following criteria in our definition of such a specimen:

COLOR:

Full or virtually full, *original* mint red visible on both the obverse and the reverse. The shade of color may range from blazing, light golden (most often encountered on Philadelphia mint coins), to a more subdued brick red (as found on the majority of the mintmarked issues.) There may be *slight* peripheral toning resultant of housing the coins in albums over the years or from a reaction caused by the sulphur content in paper roll wrappers. It must be *stressed* that the color be *original* and *not* applied through chemical treatment or an artificial toning method. Shades of purple are a reliable indication that the coin is not in its original state.

STRIKE:

The coin should be well struck up for the date and mintmark. There should be full line separation in the wheat stalks on the reverse. On coins dated between 1909 and 1920 and occasionally later, Lincoln's beard whiskers should be sharply defined. Progressively from 1920, the beard will gradually show less and less detail. In fact, some proof coins of the 30's lack completely whisker detail.

SPOTTING AND OTHER DISCOLORATIONS:

Owing to the nature of bronze, early Lincolns are *highly* susceptible to unsightly "carbon spots" or "flecks." Microscopic speckling is almost unavoidable, but the true Mint State 65+ coin should exhibit no black spots to the naked eye. *Light* fingermark tarnish is also mostly inescapable, due to handling over the years. Even the neglible amount of body oil on our hands represents a danger to virgin bronze. Yet, these marks should be invisible without strong magnification. In a nutshell, *any* black discoloration - or *even worse*, green - is cause to preclude classifying such a coin as Mint State 65+.

What follows is an analysis by year which gives *approximate retail price ranges* for MS 65+ coins meeting the aforementioned grading requirements. It is the writer's hope that the information below will provide Lincoln Cent collectors and investors with a greater insight into this now quite popular and widely collected series.

1909:

All four 1909 dated coins are relatively easy to obtain in Gem condition due to its first year of issue status: Philadelphia V.D.B.-$12-$16; San Francisco V.D.B.-$400-$450; Philadelphia "plain"-$13-$17; San Francisco "plain"-$125-$150.

1910:

Neither coin is especially difficult: 'P'-$13-$17; 'S'-$85-$105.

1911:

At this point, the going gets somewhat tougher: 'P'-$25-$30; 'D'-(almost *invariably* with a weakly struck mintmark)-$110-$135; 'S'-(oddly, this issue, along with its brethren dated 1912, 1913, and 1914 have been noticeably subject to "dipping" in greater frequency than other dates in the series - possibly because they are semi-keys)-$180-$220.

1912:

'P'-$32-$37; 'D'-$135-$160 (usually not well struck); 'S'-$135-$160 (see annotation following 1911-S).

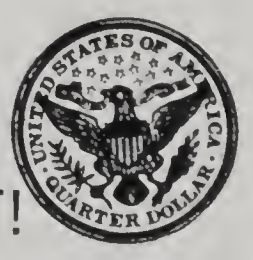

1913:

'P'-$35-$40; 'D'-$130-$155; 'S'-$135-$160 (see 1911-S).

"DATED" BARBER COINS ENJOY SPOTLIGHT!

During the past several years---until just recently---most of the attention focused on the three Barber series centered around "type" specimens. Collectors and investors (and, hence, dealers) were attempting to locate the finest pieces available for inclusion in the many U.S. type sets which were being assembled. Usually, of course, the most readily obtainable "type" examples are coins from the Philadelphia mint. This is due to several factors: the relatively large mintages of the P-mints, the tendency of most collectors (and few "investors" of the day) to ignore the branch mint issues, and the fact that the P-mints were generally better strikes. The "first-year-of-issue" 1892-P, as example, has long been popular as a "type" coin; when included in a major auction in superb condition this date often brings a phenomenal price in relation to its rather easy availability. Other less particular collectors still usually chose a choice or gem Philadelphia coin---and often still do.

However, recently things have begun to change. First of all, the price gap between the so-called "common" P-mints and the better branch mint pieces began to narrow considerably. While prices for "type" wildly escalated, the "D-O-S" issues remained somewhat static---advancing mostly when prodded along by the common dates. There was, as a matter of fact, a period a time just a year or two ago when numerous scarce dates in all three series were available for a very small premium (if any) over the common date price---even though some were many times more scarce! Now, at least part of this intense interest in type coins has been given over to "dated" material---with the Barbers enjoying a considerable percentage of the attention.

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis and the MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas covered on a monthly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the CDN publications make them a very accurate reflection of the market.

INVESTORS NOTE: the prices in the CDN publications are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

SUBSCRIPTION INFORMATION: The MONTHLY SUMMARY and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge!

A subscription to the weekly COIN DEALER NEWSLETTER is: $11.75 for three months, $40.00 for one year and $70.00 for two years. A subscription to the MONTHLY SUMMARY and Complete Series Pricing Guide alone is: $15.00 for one year and $25.00 for two years.

LINCOLN CENTS *(Continued from page one)*

1914:

This year produced issues which are quite difficult to locate in superb condition. The Philadelphia coin ($75-$90) is an underrated issue. The 1914-D is the most expensive coin in the series, although it is actually *not that rare.* For a price ($900-$1100), a nice gem coin may be found. It is an issue that is *very prone* to added mintmark counterfeiting. All 1914-D Lincoln Cents should be authenticated. In my opinion, the 1914-S is absolutely *the toughest* early Lincoln Cent to locate in Gem BU MS 65+ condition. Virtually without exception, it is found in a whitish, unnatural color. This is, perhaps, due to an off-alloy in use at the San Francisco Mint during that year. There is an auction record of $450.00 for a 1914-S which I graded MS 60+: $650-$750.

1915:

'P'-$125-$150 (brings a hefty price although overrated); 'D'-$85-$100 (often found on matte-like, grey planchets); 'S'-$375-$450 (most likely the second rarest Lincoln in real Gem 65 or 65+ condition, but not especially rare in MS 60 or MS 60+).

1916:

'P'-$16-$20 (Philadelphia coins dated 1916-20 inclusive are reasonably plentiful); 'D'-$70-$85 (auction record of $160.00); 'S'-$85-$100.

1917:

'P'-$17-$21; 'D'-$75-$90 (prone to weak striking); 'S'-$75-$90 (frequently found bluntly struck).

1918:

'P'-$21-$25 (somewhat tougher than the large mintage figure would imply); 'D'-$80-$95; 'S'-$85-$100 (often found weak).

1919:

'P'-$16-$20; 'D'-$85-$100; 'S'-$100-$120 (much scarcer than the large mintage would indicate).

1920:

Inexplicably, from 1920 onward Lincoln Cents lacked the obverse detail of their earlier counterparts. This is *especially* true of the mintmarked issues. 'P'-$16-$20; 'D'-$85-$100; 'S'-$90-$105 (sometimes *horribly* struck).

1921:

'P'-$50-$60 (fairly tough, but usually well struck); 'S'-$350-$425 (this is one of the very *difficult* coins in the series - occasionally found with an acceptable strike, yet almost *always* spotted or discolored).

1922:

'D'-$140-$160 (difficult to find sharply struck---in addition, the majority of extant specimens are spotty or otherwise inferior). There is a <u>variety</u> with a very weak or *missing* mintmark---always weakly struck on at least one side and *very rare* in mint state; MS 60+ pieces can command as much as $1500 and, if ever located, a gem MS 65+ would certainly set an impressive price record (perhaps as high as $5000)!

1923

'P'-$17-$21, 'S' $425-$500 (still another scarce coin which is generally unable to meet our 65+ criteria. Most specimens have problems with either strike, lack of original color, or spotting. Red and brown, spotty uncirculated examples are relatively common, as a sizeable hoard was recently disbursed).

1924

P' $50-$60 (Although the mintage figures for this coin are nearly the same as for the Philadelphia coin of the previous year, the 1924 is *much* scarcer). 'D' $125-$500 (Carbon flecked, red and brown coins of this issue are relatively easy to locate). 'S' $250-$300 (virtually always softly struck [illegible] are *definitely* scarce).

1925

P' $16-$20. 'D' $80-$105 (usually retains full brilliance, but often bluntly struck). 'S' $90-$95 (streaked planchets are often encountered---as are [illegible]).

1926:

'P'-$15-$19; 'D'-$180-$200 (same comment as for the 1925-D, yet strike is often even *worse* on this coin. One of the rarest Lincolns if fully struck---a Gem brought $310.00 at auction recently); 'S'-$300-$350 (usually softly struck, with many examples having been cleaned).

1927:

'P'-$14-$18; 'D'-$80-$95; 'S'-$110-$125 (yet another that is usually bluntly struck---auction record of $190.00).

1928:

'P'-$14-$18; 'D'-$65-$75; 'S'-$85-$100 (usually weakly struck).

1929:

'P'-$9-$12; 'D'-$22-$27; 'S'-$15-$19.

1930:

'P'-$8-$11; 'D'-$21-$25; 'S'-$12-$15.

1931:

'P'-$21-$25; 'D'-$70-$80 (actually *much* scarcer than the 1931-S, but the Denver 1931 doesn't have the "romance value" of its San Francisco twin); 'S'-$65-$75 (many original rolls and probably even some bags were saved due to the low mintage. Still, *truly superior* pieces are tough to locate.)

1932:

'P'-$18-$22; 'D'-$19-$23.

1933:

'P'-$19-$23; 'D'-$20-$24.

1955/55:

Struck at the Philadelphia, this "double die" is rather plentiful in all grades up to, but not including, MS 65+. A vast majority of the "full color" pieces seen have been cleaned and/or processed to look original. A true gem is worth $800-$1000.

"DATED" BARBER COINS ENJOY SPOTLIGHT!

(Continued from page one)

Of the numerous important books and articles written in recent years, very little space has been devoted to the three Barber series. There is, naturally, a handful of dealers and investors who are thoroughly knowledgeable about these series---but, in general, much more is known about the earlier Seated Liberty material and the later series such as "full strike" Buffalos, "full bands" Mercuries, "full head" Standing Liberty quarters, etc. In a nutshell, there is still much room for research on the Barbers!

Today's CDN "bid-ask" prices are obviously beginning to reflect relative scarcities in these series---as a quick comparison with current "Redbook" prices will reveal. However, there are probably as many "sleepers" in this area as in any other silver series---and most likely <u>more</u> than in most. A simple example is the "common" 1910-D dime which lists in the latest "Redbook" at a totally common date price of $110! Recent auction records of "choice MS-65" pieces (not superb gems) have reached the $400 mark---as just two or three knowledgeable bidders vied for this rarely offered piece. (The dealer "bid" level is still a reasonable $285.) Other vastly under-rated dates include 1901-S, 1902-S, 1903-S and 1904-S---among <u>numerous</u> others. No meaningful recent auction record for the 01-S is available, but both the 03-S and 04-S have very recently been purchased <u>by dealers</u> thru auction at prices <u>well in excess</u> of $1000 each (the "Redbook" listings on these two are a mere $290 and $225 respectively!). These same discrepencies exist across both the quarter and half dollar series---and, again, there is a substantial amount of room for price advancement for the previously overlooked dates. In line with the need for research, the CDN staff is hard at work on a comprehensive study on all three series---and they will be presented as soon as they meet our requirements of accuracy and thoroughness.

There are, at present, a <u>few</u> major dealers who are devoting a considerable amount of time to the Barbers---seeking out top quality specimens for their clients---and for inclusion in major auction sales. Even this limited amount of activity has served to point up many previously unknown (at least, <u>generally</u> unknown) scarcities---as well as true rarities.

By the way, one of the choicest and most complete Barber coinage listings of the past decade will be offered at a New York City auction late this year. On November 2nd, N.S.A.C.A. (Numismatic and Antiquarian Service Corporation of America) will "knock down" all dates and mintmarks in all three series---with virtually every specimen in choice MS-65 or gem MS 65+ condition. Undoubtedly many price records will be set---and, in all likelihood, new standards for the pricing of the scarce and rare mintmarked pieces will be taken from the auction results. The CDN will keep subscribers informed with an in-depth analysis immediately following this unusual and important numismatic event!

GOLD SERIES by date

Common date coins in the following listings were computed on a basis of gold bullion at $148.35 per ounce.

Gem MS-65+ specimens are worth more than the MS-65 prices listed below.

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.50 per ounce.

Earlier rolls average good; later rolls usually include higher grades.

Prooflike MORGAN DOLLARS ---an update !

by DAVID HALL

A great deal has happened since the original article on prooflike Morgan dollars appeared in the May '77 issue of the MONTHLY SUMMARY. If at that time the silver dollar market could have been described as "red hot", it can now accurately be called "pure white heat"! Any average roll of 1883-O's will now fetch at least $140---and very soon any nice full MS-65 "common date" should easily be worth $10. During these past few months, the tough O-mints, elusive Philadelphia and San Francisco issues---along with even the very available Carson City issues---have all fared as well (if not better) than the common dates.

While the BU dollar market can be described as "white hot", the prooflike dollar has become almost total madness! Collectors and dealers scour bourse tables like sharks in a feeding frenzy---buying anything that even approaches a prooflike specimen. In the various trade papers, dealers advertise scarce and rare prooflike dates at what appear to be extremely high prices---only to receive as many as twenty or thirty orders for the one and only piece in stock! In light of this incredible demand, prices for choice prooflike Morgans have increased substantially---to say the least---during the past six months.

Just what is a prooflike dollar? A prooflike specimen is one of the first impressions from a new die that---because of a combination of super strike, superior planchet and new dies---has mirror finish fields. The fields are reflective and you will often see a potential buyer holding a pen or pencil several inches away from a coin to ascertain just how mueh of a mirror effect the particular piece exhibits. In the past, collecting prooflike dollars was a highly specialized area---pursued by only a handful of sophisticated and knowledgeable collectors. But now the prooflike dollar has gained widespread appeal---and there simply aren't enough choice pieces to go around!

This recent unprecedented demand has pushed priees for prooflikes substantially ahead of levels which six months ago seemed only in the realm of a "long term" possibility! At present, there is virtually no price resistence in the easily affordable "under $100 per coin" category; in my opinion, a price tag of $50 for any truly choice MS-65 prooflike Morgan is a very likely possibility for the relatively near future!

The following are current conservative wholesale price ranges for full deep mirror surface MS-65 Morgans. Inferior coins sell at considerably reduced prices---and superb MS-65+ "wonder coins" can bring many multiples of the prices listed!

$15 to $20: 1879-S, 1880-S, 1881-S, 1883-O, 1884-O, 1885-P, 1885-O, 1886-P, 1887-P, 1904-O.

These ten coins can still be called "common" in prooflike condition. However, the incredible demand for prooflike Morgans could quickly move these dates into the "elusive" category. Six months to a year ago, these coins were readily available for $10 to $12. they are now hard to buy at $15!

$20 to $30: 1878-S, 1881-O, 1882-O, 1882-S, 1896-P, 1898-P, 1898-O, 1899-O, 1900-P, 1901-O, 1902-O.

The first four dates in this group are the most common. The remaining dates are somewhat more elusive—with the 1901-O being the toughest of the group.

$30 to $50: 1878-7TF, 1878-8TF, 1878-CC, 1882-CC, 1883-CC, 1884-CC, 1888-P, 1888-O, 1889-P, 1897-P, 1900-O, 1921-P.

Both the 1878-7tf and the 1878-8tf along with the Carson City issues are relatively easy to aquire in prooflike condition. Two to three years ago, rolls of prooflike 1888-O's were often available; now even this date is becoming one of the scarcest of the "common" dates—with occasional dealer-to-dealer sales recorded at over $50!

$50 to $75: 1879-P, 1879-O, 1880-P, 1881-P, 1882-P, 1883-P, 1903-P.

The early P-mints have long been recognized as prooflike rarities—and they still have a bright future!

$75 to $100: 1878-7/8TF, 1880-O, 1884-P, 1887-O, 1887-S, 1890-P, 1890-O, 1890-S, 1891-S, 1897-S, 1899-P, 1903-O.

Actually, with the exception of the 1884-P and 1890-P, none of the other coins in this group is particularly scarce in choice prooflike condition—but all now often change hands within this price range.

$90 to $125: 1880-CC, 1881-CC, 1885-CC, 1890-CC, 1891-CC.

The 1881-CC and 1885-CC are the most common in this group; the 1890-CC is by far the scarcest.

$100 to $150: 1889-S, 1891-P, 1902-P, 1921-D.

The 1889-S is the most easily located coin in this group; the other three are genuinely scarce.

$175 to $250: 1885-S, 1886-S, 1888-S, 1898-S.

The 1885-S is very underrated. There are many "one-sided" prooflikes—but they are worth only a small premium over MS-65 "bid", two-sided deep mirror surface prooflikes are truly scarce. The 1886-S, 1888-S and 1898-S are scarce as dates (in mint state) but are not particularly tough in prooflike condition.

$250 to $350: 1892-CC, 1899-S, 1900-S.

The 1892-CC is not rare in prooflike—and most S-mints before 1900 are not particularly scarce in prooflike (the 1899-S is no exception). All S-mints after 1899 are extremely tough in prooflike and the 1900-S, again, is no exception—it is a genuinely underrated date.

(Continued on page two)

AUCTION TRENDS

The recent Bowers and Ruddy Galleries auction of the "Fairfield Collection" (Oetober 6-8) included an extremely impressive section of 438 lots of U.S. gold coins---highlighted by one of the most outstanding collections of quarter eagles ever offered for sale. As the catalog introduction pointed out, "with just a few exceptions all of the various date and mintmarked issues are represented---including all of the "rarest of the rare" issues from 1796 to 1834." Among the extensive listing of later issues, included was the 1841 "Little Princess", the 1848 "CAL" and the famous 1875 proof. Also included in the 226 lots dated between 1834 and 1929 were many Charlotte, Dahlonega and New Orleans issues in eonditions rarely offered for sale. In fact, as was explained in the catalog, this major auction event gave bidders an opportunity to acquire most of the great rarities---often in the finest available condition. (Some of the specimens auctioned were in conditions not available for thirty years or more!) Needless to say, the prices realized at this important numismatic event were commensurate with the quality of the eoins offered.

Listing all of the prices realized, of course, would be an impossible task considering our limited space and the ineredible scope of the auction. However, among the early date highlights were: 1796 "no stars" XF/AU $15,500; the ultra-rare 1804 "13 star reverse" XF $9,250; the one-year-of-type 1808 "Capped Bust to left---large size" XF/AU $11,000, a "borderline uncirculated" and exceedingly rare 1826 (total mintage of 760) $10,000, a "gem BU, prooflike" 1831 $7,750 and the extremely rare 1834 "with motto" (probably no more than a dozen known) in prooflike AU eondition $19,000! (The current Redbook listing in Uncirculated condition is only $13,000!)

All of the 1834-39 "Classic Head" issues were represented---again in grades rarely encountered. The "superb gem BU" 1834 first year-of issue specimen went to the winning bidder at $2,550 and the final-year 1839-O in "choice BU" sold for $2800!

PROOFLIKE MORGAN DOLLARS — and update!

(Continued from page one)

$300 to $400: 1889-O, 1892-P, 1894-S.

The 1894-S is occasionally available in prooflike at a modest premium over MS-65 "bid". The 1892-P is seen in prooflike—but quite infrequently; it was a solid $200 wholesale coin three years ago and is now moving ahead with the entire prooflike dollar market. I have witnessed several sales between dealers of truly superb pieces in the $500 to $800 range! The 1889-O is currently heading most MS-65 want lists. The incredible demand for fully struck frosty pieces has made prooflikes an "overnight rarity" this date could be selling for over $1000 within a year, if not sooner!

$400 to $500: 1883-S, 1902-S.

Both of these dates are rare and still somewhat underrated. You will see about fifty prooflike 1889-O dollars for every 1883-S or 1902-S you encounter!

$500 to $1000: 1893-P, 1896-S, 1901-S, 1921-S.

The 1893-P is truly rare! The 1896-S is also rare—in fact, the 1896-S is quite underrated in MS-65 condition, (being one of the few dollars that has not increased in price during the past couple of years.) The 1901-S is a true "sleeper" in prooflike condition; I have never seen a fully prooflike MS-65 specimen. The 1921-S is an incredible rarity in full prooflike condition. There are supposedly two known —though I have not personally seen either coin. Semi-prooflikes that are more the owner's "imagination" than prooflike have been fetching $100 or more!

$1000 to $1500: 1879-CC, 1886-O, 1891-O, 1893-CC, 1897-O, 1904-P, 1904-S.

The 1879-CC and 1893-CC are scarce as dates in mint state, full prooflikes are worth a modest premium over MS-65 values. The three O-mints in the group are very rare!—with the 1891-O probably being the rarest of the three. The 1904-P may not exist in full prooflike condition. The 1904-S is also a major rarity with choice prooflike surfaces. A deeply-toned prooflike "possible branch mint proof" realized over $3000 at a recent auction!

$1500 to $2000: 1894-O, 1895-S, 1896-O.

The 1895-S is very rare as a date in choice MS-65 condition—but prooflikes are not relatively rare. The 1894-O and 1896-O are "super rare"—with a prooflike MS-65 specimen appearing on the market only once every four or five years.

$2000 to $3000 plus: 1892-O, 1893-O, 1894-P, 1903-S.

Both of the O-mints are virtually impossible to locate! I have seen two fully prooflike 1892-O's—and both were sold within the past year in this price range. I have never seen a prooflike MS-65 1893-O—but I would sure like to! Again, the 1894-P and 1903-S may not exist in deep mirror prooflike condition. If ever offered at auction, they would surely bring a "runaway" price!

$4000 plus: 1889-CC

Rare in all grades and very much a part of most major dealers' "want lists" in frosty MS-65 condition. However, this date is not relatively rare as a prooflike. You won't see many MS-65 1889-CC dollars—but about one in every three will be prooflike

$5000 plus 1884-S, 1895-O, 1901-P.

The 1884-S is a major rarity in frosty MS-65 condition. Its existence in prooflike is doubtful, although I have recently examined a nice "one-sided" prooflike piece. The rarity of the 1895-O—frosty or prooflike—has long been recognized. I have heard a rumor that there is a prooflike on the East Coast—the asking price: $12,500!!! The 1901-P is a "monster" in prooflike condition. Like the 1921-S, it's entire mintage was so poorly struck that it's existence in prooflike condition is a miracle. The famous "Bruce Todd" specimen (full deep mirror fields but with a minor but noticeable cut on the hair) recently changed hands between dealers for $[illegible]. (There is supposedly one other known prooflike.)

$12,500 plus: 1892-S

This issue falls into the same category as the 1889-CC—except change "one in three" to "one in ten"!

???: 1893-S

This date is extremely rare in true Mint State (MS-60) condition—with a choice MS-65 example appearing perhaps once every year or two. I have recently examined a choice semi-prooflike which is as close to the real thing as I've ever seen. (I have not seen nor heard of a true deep mirror prooflike.) If one were ever auctioned, it would definitely set a record price. However, since the coin is extremely rare in MS-65 (MS-65 "bid" is $27,500.00), I don't think it could possibly bring any multiple premium; a price of $30,000 to $50,000 seems "reasonable"!

AUCTION TRENDS

(Continued from page one)

The 1840-1907 Liberty Head design holds the distinction of being the U.S. coin design with the longest continuous usage without a major change or modification. This B & R auction contained 191 coins dated between these years---again, with many pieces falling into the "perhaps finest known" category. The 1841 "Little Princess" in XF condition brought $19,000 (seven to nine examples known); the 1848 "CAL" in "Gem BU, nearly full prooflike" condition found a new owner at $18,500---and the "Brilliant Proof" 1875 (with a mintage of just twenty pieces) sold for $15,000! Among the many branch mint issues prices were strong for the numerous elusive high grade specimens offered---and, when a choice BU piece reached the auction block, Redbook listings were left far, far behind. Examples: 1847-C in "Choice BU" condition $2700 (Catalog $1000) and 1855-C in the same grade $5,500 (Catalog $3000). In the large mintage "common date" category, exceptional examples brought very impressive prices---such as the $850 realized for a "gem BU" 1851, the $1,050 brought by both the 1855 and 1856 (in the same ultimate condition) and the $1350 realized for the 1861 (another high mintage date in the very uncommon "gem BU" grade!) From the early 1860's thru 1907 many dates were represented by brilliant, choice and gem proofs---with prices varying widely from $1500 to over $9000 in accordance with rarity and condition.

A few more highlights among the later quarter eagles and higher denominations include the $2500 brought by the 1911-D $2½---and the $1800-$2600 range realized by the several $2½ Indian matte proofs. A "gem BU, virtually MS-70" 1854 $3 specimen astounded many hopeful bidders by reaching what is certainly a record $7,750 (this is the highest mintage of any three-dollar gold piece). Prices for proof $3 pieces ranged, again according to quality and rarity, from $4300 to $7000. The early $5 and $10 pieces also fared quite well---with anxious bidders scrambling for the top grade and rarely offered dates. Proof $5 Liberties sold in a $2100-$2600 range and the two matte proof Indians which were included fetched $3250 (a "choice" 1908) and $3800 (a "gem" 1915). Proof $10 Liberties went to successful bidders in the $4000-$5250 range and both the 1908 and 1911 "choice" matte proof Indians went for $4500 each! Two rare $10 Indian dates were also a part of this important auction---a "BU" 1920-S ($9500) and a "gem BU" 1930-S ($9000).

Double eagles were not represented by many outstanding specimens---but a "choice" 1902 proof brought $6200 while the common date 1907-D in "gem BU" condition sold for an impressive $475! A "superb gem BU" 1907 high relief, by the way, went to the successful bidder at $6500.

This auction catalog will be considered a major reference in the field of U.S. gold coins---particularly, of course, for quarter eagles. Those who are seriously interested in this area of U.S. numismatics should consider contacting Bowers and Ruddy Galleries to check the possibility of obtaining a copy of the catalog along with a list of prices realized for their library.

Common date coins in the following listings were computed on a basis of gold bullion at $158.20 per ounce.

GOLD SERIES by date

Gem MS-65+ specimens are worth more than the MS-65 prices listed below

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.76 per ounce.

Earlier rolls average good, later rolls usually include higher grades.

WALKING LIBERTY HALF DOLLARS

. . . an in-depth look

by James Bennett Pryor

It seems logical that the Liberty Walking half dollar series should be divided into two groups---1916 thru 1933 and 1934 thru 1947. A subdivision of the later dates would, of course, be from 1941 to 1947---commonly called the "short set". This subdivision is collected by many more people than is the whole set or even the 1934-47 group. The main reason for uncirculated Walking Liberty halves being divided into these two main divisions is that the 1916-33 group contains the lowest mintage, scarcest to find in choice condition and highest priced coins---while the 1934 to 1947 group contains, in general, the lower priced, easier to locate dates. The current retail price range of the sets is approximately as follows if each and every coin is Choice or Gem Unc---with most dates being in Gem condition: 1941-PDS to 1947-PD (the twenty coin "short set") $450-$550, 1934-PDS to 1947-PD (the second group) $3300-$4000 and 1916-PDS to 1947-PD (the complete sixty-five piece set) $38,000-$53,000. It is interesting to note that when the first "Redbook" was published thirty years ago, these sets were valued as follows: the 1941-47 set-$22.00, the 1934-47 set-$75.00 and the complete 1916-47 set-$975! Note that since then the "short set" has increased by a factor of twenty-five times---while the other two sets have increased approximatcly fifty times their 1947 value! Up until about twelve to fifteen years ago, few collectors attempted to complete the sixty-five piece set---but in the past four or five years, many collectors have turned to the task of assembling the full set (and many in the ultimate condition!) This, obviously, is the reason for the huge increases in prices of each individual coin---but especially the dates from 1916 to 1933. Let's consider these groups in reverse order:

1941-PDS thru 1947-PD "Short Set"

When I started collecting in 1963, this set could be purchased in Choice condition for from $100 to $125. By 1967 the price range was in the $150-$200 range. In the spring of 1973, the price edged up to the $300-$350 area---and it fluctuated from that range to $400 and a little higher, back and forth to the present level of approximately $450-$550. With the exception of the highly touted 1941-S---and 1942-S, 1943-S, 1944-S and 1945-S---all dates can be found in Gem fully struck condition. However, these five "S" mints present quite a problem in the "ultimate" condition. The 1941-S in average to rather weak Unc condition can be purchased in the $75 area--but a "FSG" (Fully Struck Gem) would no doubt bring from $150 to $200 at auction. Of the other four "S" mints, the 43-S is easiest to find in FSG. All of these four dates, however, are "sleepers" in FSG and no meaningful auction records can be found. Remember, it was not until the past three or four years that collectors, investors and dealers have been particularly interested in FSG Walking Liberty halves in the so-called "common dates" and it has been only recently that the true scarcity (perhaps even rarity) of these dates has been known. These four dates are definitely good buys at up to twice their normal value when located in strictly FSG condition. All twenty dates in the "short set" can be found by the roll---although more and more rolls are being broken up to make single sets and, thus, complete original rolls are harder and harder to find. The 1946-D has the lowest mintage in this group, but it is readily available even in roll quantity as it was greatly hoarded. It seems to me that the best "roll buys" at present levels are the 1944-DS and 1945-DS.

Perhaps a definition is in order at this point. Just what is considered a fully struck Walking Liberty half dollar? Generally, there are FOUR critical areas—three on the obverse and one on the reverse. Obverse: (1) HEAD - There will be some separation of Liberty's forehead and cheek and a slight separation of the ear area from her hair below the bonnet and just above her eye to just below her ear. This area should all appear "raised" and the hair will be slightly "curly" except over the ear. Note: In all 1916 and 1917 issues, this "curly" area over and back of the eye is less pronounced and thus does not show up as well as on the issues from 1918 on. In essence, the "hair area" between Liberty's face and her bonnet must NOT be flat. (2) HAND - Liberty's hand at her side must appear rounded. There will be a distinct "V" between her thumb and fingers. The branch "stem" carried by this hand must be split not only at the end of her thumb but there must also be another one between her thumb and forefinger, extended at least as long as her extended forefinger. There will be one slight separation of the fingers, at the top, close to her knuckles (commonly called "knuckles showing"). (3) SKIRT LINES - All skirt lines immediately over Liberty's foot must show and must NOT be "gone" in the center around the knee area or at the top. NOTE: These skirt lines are fairly strong on all 1916 issues, weaker on the 1917 issues and very weak on the 1918 issues. In 1919, 1920 and 1921 they are again fairly strong—just slightly better than 1916 issues. Beginning with 1923, the skirt lines are strong. Draw an imaginary line from the top of the "I" in Liberty to the top of "W" in We. The skirt lines do NOT show on all 1916 to 1921 issues above this line—while on all dates from 1923 on they are strong, and curve to right. Reverse. Draw an imaginary line from left side of "E" in States to the second "L" in Dollar. Then, draw another from second "S" in States to "H" in Half. The area between these two "lines" on the eagle's breast must NOT be flat or missing. NOTE: On the obverse, the "line" in front of Liberty's toes over the date is sometimes "flattened out" toward the rim below because of the strike, however, unless serious, this does not detract from the value of an otherwise "FSG" specimen. (The abbreviation "FSG" will be used throughout the following study to note "Fully Struck Gem".)

1934-PDS thru 1940-PS:

These nineteen dates had a Redbook value of only $53 when the first edition was published in 1947---twenty years later, in 1967, they could be purchased in Choice condition for from $700 to $900. For years, the lowest mintage of this group---the 1938-D---was "king". However, this date was also hoarded more than most and was (and is) readily available in Unc. However, for some reason, FSG pieces are very scarce---most come with only average to good strikes and many are "baggy". In the mid-sixties, when the 1934-S and 1935-S "booked" for around $75 or so, Choice pieces could hardly be found. However, today, with the 1934-S "bid" at $425 (and selling retail in the $500 range) it seems that almost every large dealer has a few to sell! Almost all of these nineteen dates and mints---with the possible exception of four or five Philadelphia issues---were heavily promoted beginning in the spring of 1973. Possibly, the 1936-S issue has the "roller coaster" honor of this period. In April, 1973, "bid" on the 1936-S was a modest $35---but by December, 1975, it had exploded to $270---an eight-fold increase in this short time! Some seven months later it had dropped back to $140---and it presently resides at the $120 "bid" level. Obviously, pure collector demand did not make this date react this way during this period. Most of the other dates had similar experiences in this period---to a lesser extent. However, several dates rose rather substantially and diminished only slightly when profit taking time came. Thus, most (if not all) of the 1934-1940 dates were underpriced at the 1973 levels.

The toughest dates to find in FSG are 1935-D and 1940-S. I have never seen a full head and full hand 1935-D! Although a full head 1940-S is not rare, a full hand is---at least with a full head to match! The easier dates to find in FSG condition are: 1934-PS, 1935-P, 1936-PDS, 1937-PDS, 1938-P, 1939-PS, and 1940-P. The easiest dates to find by the roll are: 1936-P, 1936-S, 1940-P and 1940-S---with the 1939-P and D next. Any other dates are few and far between. Strangely enough, ALL the "S" mints from 1934 to 1939 are found strongly struck---while from 1940 to 1945 they are all very weak! At present levels, the 1937-P, followed by the 1935-P, look most attractive as underpriced. This does NOT count the 1935-D in FSG which would bring at least $400 at auction---perhaps as much as $600! The 1940-S FSG is in the same price range as the 1941-S---or perhaps somewhat higher. The 1935-D, 1940-S and 1941-S are RARE in FSG condition.

1916-PDS to 1933-S:

1916-P: Saved in quantity at the time of issue, this popular date usually comes fully struck---or nearly so. FSG coins, therefore, can be located without too much difficulty. The date could be purchased for from $30 to $60 in 1963-64; the current value in FSG condition is now in the $400-$500 range. The high auction record is $510 (12/76 Ivy sale). The 1916-P is rated slightly more scarce than the higher mintage 1916-D---but, in reality, it is just a bit more common.

1916-D: The above comments also apply to this issue. The current retail value in GFS condition is from $350 to $425---with a high auction record of $425 (7/77 New England Rare Coin Galleries).

1916-S: In 1963, this date retailed in the $110-$125 range. It is much more difficult to find than the "P" or "D"---but, nevertheless, the 1916-S can be found in FSG condition. Many specimens, however, tend to be weaker in the hand area on the obverse and in the breast region on the reverse---while the head and skirt lines are usually full like the other two first-year-of-issue coins. Current retail value $625-$750. The high auction record is $725 (3/77 Stack's sale).

1917-P: This is the most "common before 1934 in uncirculated condition. However, strictly FSG pieces are hard to find due to the fact that most are somewhat "baggy" and/or not quite fully struck. The current retail value is $150 to $190; the high auction record is $165 (6/77 Bowers & Ruddy sale). Many Uncs of this date, by the way, have been used to make the many counterfeit 1917-S (obv.) coins which are on the market.

1917-D (obv.): This date can be found in FSG condition rather easily; the current retail value is $425-$500---with a high auction record of $575 (8/76 Ivy sale). In the first edition of the Redbook---thirty years ago---only six dates were listed as worth more than the 1917-D (obv.) and it was then priced at about ten percent more than the 1921-S!

1917-S (obv.): This is a tough date in Uncirculated condition. However, it can be located in FSG condition because most specimens were well struck. In 1947, this issue was "king" of the Unc Walking Liberties; at that time it was worth twice the amount listed for the then next rarest date---the 1919-S. Many, many fakes of this date are known and this fact tends to downgrade its true value. The current retail is $900 to $1350---with a high auction record of $1600 (3/76 N.E.R.G.G.).

1917-D (rev.): This issue is scarce in full uncirculated condition and very scarce in FSG---but, with a bit of searching it can occasionally be located in this ultimate condition. It is, however, underrated and underpriced in top condition! Current retail $550-$700; the high auction record is $690 (3/77 N.E.R.C.G.).

1917-S (rev.): This date has always been considered "common" in Uncirculated condition, but nice specimens have---and continue to be---very difficult to find. It is usually weakly struck in the hand area and in the corresponding breast feather region on the reverse. FSG pieces are extremely scarce and very underrated at present. The current retail is $400 to $600 and the high auction record is $500 (12/76 Ivy sale).

1918-P: This date can be found FSG condition without much trouble as it usually comes with a near to full strike. It is MUCH easier to find in this condition than the considerably lower rated 1920-P. Current retail value $400 to $500. The high auction record is $550 (7/76 Paramount "Elrod Sale").

1918-D: Until two to three years ago, the 18-D was considered an easy date and thus was vastly underrated. However, it has now come into its own. (I bought a near gem 1918-D for $260 at the 1975 ANA Convention from a bourse dealer, for example.) It has always been a very scarce date in Choice or GEM condition. This date comes weakly struck, average struck, and fully struck--but FSG are very difficult to locate. Current retail value $700 to $850. The high auction record is $800 (3/77 Stack's sale).

1918-S: Exactly the same comments as for the 1917-S (rev.)---and of equal value in Unc until this year; it is now considered slightly more scarce. Current retail value $450 to $550. A high auction record of $500 (7/77 N.E.R.C.G.).

1919-P: This issue was vastly underrated until the last four or five years. It was almost impossible to find ten to twelve years ago when the retail value was listed in the $150-$225 area. Now, it is the easiest date to find in FSG condition that sells for $1000 or more. This date is usually found fully struck and with a little searching FSG pieces do not present much of a problem; however, it is still scarce as a date in full Unc. Current retail value $1150 to $1300. The high auction record is $1350 (12/76 Ivy sale).

1919-D: This issue is extremely rare in well-struck Gem condition and even rarer in FSG condition. I have seen and heard of only one fully struck coin of this date in the past fourteen years! This particular coin came out of a full-set that was broken up during the 1975 ANA Convention and was sold to another dealer for $1,500. Then it was resold---evidently to a collector for $2,100. It then reappeared in Paramount's "Elrod Sale" at $2,800! This coin, while fully struck, has a curious circular dig on the top of Liberty's head or, perhaps, it would have sold for even more! The only other top-quality coin to be sold at auction in the past four years, to my knowledge, was the "above average" strike (not full) Choice Unc in the Kreisberg 11/76 sale---at $1,800. It is almost always weakly struck in the hand area and also often in the head area. Certainly, this date is one of the four rarest dates in FSG condition. Current retail-$3000 and up---and if a FSG were to be auctioned, it could bring a price in the $4,500 to $5,500 range!! It was vastly underrated in choice condition until the last year or so (and, actually, it still is at present!)

1919-S: Another date which is extremely rare in FSG condition---but not nearly so hard to find in well struck GEM condition and thus perhaps slightly overrated at present time. Weakly struck Uncs, like the 1919-D, are not hard to find. However, this date usually comes with a weak or average strike---especially on reverse. However, there have been at least five truly exceptional Uncs auctioned in the past year and I have personally owned five or six others in the past two years---so this date in well struck GEM condition can be located. The 1919-S has always, from 1947 to date, been considered one of, if not the, toughest date to find in the ultimate condition. However, in my opinion, it is easier to find in FSG condition than the following dates: 1919-D, 1921-S, 1927-S and 1928-S. Current retail value $3500 to $4500. Auction records in the past year of $2,800, $3,200, $3,750, $3,800 and the high record of $4,300 (11/76 Kreisberg sale). For some curious reason many specimens of this date have a "mashed" mintmark---on these pieces the "S" is very hard to make out.

1920-P: This date is usually considered a "common date"---and it is in average Unc condition. However, FSG pieces are very underrated and are quite scarce. Current retail value is $350-$400. The high auction record is $390 (3/77 Stack's sale).

1920-D: This date is hard to find with a full head, though FSG's do exist. It is very rare in choice condition and is usually one of the last few dates found to complete a nice set. Underrated--and especially so in relation to its mate, the 1920-S, which usually follows the price direction of the 1920-D. This date is at least two or three times as rare as the 1920-S in true Unc---but not nearly as rare as 1920-S in fully struck GEM condition. Current retail price $1800 to $2400. Recent auction results: $1,650 (7/77 N.E.R.C.G.); $2,300 (12/76 Ivy auction); and a record of $2800 (3/77 N.E.R.C.G. sale).

1920-S: Not too hard to find in average or weak struck Unc--but extremely rare in FSG condition. This is perhaps the fifth hardest date to find fully struck. The current retail value is $1500-$2100---with auction records of $1250 (Paramount 7/76), $1500 (Ivy sale 12/76), and a high of $2600 for a true gem (NERCG 7/77). Curiously, many Uncs of this date exhibit extreme raised die polishing marks running in all directions in the field above the sun and to right of "L" in Liberty. *Note: This date in choice to GEM condition was very difficult to find until I recently sold an unbelievable hoard of forty pieces to a leading dealer. It should now begin to show up in choice condition due to this hoard being sold; however, there were only five FSG coins in the entire hoard!*

1921-P: Perhaps over half of the Uncs known of this date are fully struck or nearly so---and FSG pieces are not too much of a problem to find. Like the 1919-P, this is one of the two easiest higher priced dates to find in top condition. Current retail value $1900 to $2200. Recent auction results: $1600 (Kreisberg 11/76), $1700 (Stack's 3/77), $1800 (Paramount "Elrod Sale" 7/76); $1825 (Bowers & Ruddy 6/77). This coin boasts the second lowest mintage of series at 246,000---but it somewhat overrated in relation to other dates in Unc. Evidently several rolls were saved in 1921.

1921-D: This is the lowest mintage Walking Liberty half---with only 208,000 pieces struck. It is much harder to find than the 1921-P in FSG condition, though it is not extremely rare. Evidently several rolls were saved at the time of issue. Perhaps there are about the same number of 1921-P and 1921-D's known---but the 1921-D is rated higher because of its low mintage and the fact that it is much harder to find in FSG condition. A FSG of this date at auction might bring a price in the $3,000 area. Current retail value $2200 to $2500. Recent auction results: $1900 (7/77 N.E.R.C.G.), $2000 (6/77 Bowers & Ruddy), $2100 (11/76 Bowers & Ruddy), $2100 (Stack's 3/77), $2200 Paramount "Elrod Sale" 7/76) and $2350 (N.E.R.C.G. 7/76).

1921-S: This is the "king" of Unc. circulated Walking Liberty halves. It has the fifth lowest mintage of the series and is the only date that is rare in all conditions, whether weakly struck, average or above average. Rumor says that only one roll was saved at issue; however, there is more than likely a total population of twenty-five to forty (this is only my "guestimate" and it could be more or less) of this date. Until about twelve years ago the 1921-S was not considered the rarity it actually is---but it has now come into its own. Currently the finest known FSG is choice and it would be interesting to see what one would bring at auction, if offered. Several are known that are very well struck and could be called Choice or Gem, but they are NOT fully struck. Perhaps just to name a few, Uncs have been sold at auction during the past four years, and possibly four to six have been sold privately---although some of these could "overlap". Along with the previously mentioned 1919-D, the 1921-S is certainly one of the four rarest issues in FSG condition. This date has at least tripled in value over the last four years in Choice condition. Believe it or not, in early 1973, $3,500 was considered a full retail price. By the summer of 1976, the price had doubled---and it has now doubled again! Current retail value $12,000 to $14,000. A FSG at auction might bring $15,000---or even a little more. Recent auction records: $3,500 (8/73 Stack's), $4,000 (3/75 Stack's), $4,050 (5/73 Bowers & Ruddy), $4,600 (5/73 Stack's - This coin was the best struck 1921-S I have ever seen), $6,750 (7/76 NERCG), $9,500 (7/76 Paramount "Elrod Sale" - later, reported via two dealers to a private collector at $13,500), $8,500 (4/77 Stack's), $11,000 (3/77 Stack's), $11,500 (7/77 NERCG). A private sale to a collector of $14,500 was reported by Robert L. Hughes, Inc. over a year ago. *About 3 years ago, I owned three different Uncs at the same time---two Gems and one MS-60. Unfortunately, I sold the two lesser quality ones at that time! Interestingly enough, in the 1947 Redbook the Unc 1921-S was rated as only worth about fifteen percent of the value listed for the 1919-S! My, how times change! Twenty to thirty years ago, only the 1917-S (obv.), the 1919-S and, to a lesser degree, the 1921-P, were considered scarce in Unc condition!*

1923-S: This date is underrated and is one of the hardest dates to find nice in Unc condition; true Uncs are few and far between. However, this issue usually does come well struck---and FSG's, although rare, can be found. This is the first year with the "higher and deeper" engraved skirt lines. Current retail value $1200 to $1600; high auction records: $2,400 (11/76 Kreisberg)---but the next highest are: $1,650 (3/76 NERCG), $1,500 (12/76 Ivy) and $1,350 (7/77 NERCG).

1927-S: Rather common in weak Unc, but quite scarce in average strike. Well struck GEMS are extremely scarce and FSG's are extremely rare---if, indeed, they do exist. I have never seen nor heard of a fully struck 1927-S GEM in my fourteen years of experience. An original roll was broken up at 1975 ANA convention and while many were very nice, none were really close to being full strikes. This date has not reached its potential because of the lack of top-quality fully struck examples coming on the market. Even today, a weakly struck example will only command $250 to $350 (even if in otherwise Choice condition) and the very best struck Gem one can find will only sell in the $700 area. If a few really nice ones ever do reach the general market, watch this date double or more overnight! Current retail is $650-$750. The high auction record is a low $725 (7/76 NERCG). Bowers & Ruddy Galleries sold "Choice BU's with weak centers" for $200 - 11/76!)

1928-S: Just about the same comments for this date as 1927-S except that the total population of true Uncs is much less---hence, this date sells for more. Still, like the 1919-D, 1921-S and 1927-S, this is one of the four hardest dates to find in FSG condition. Usually weakly to very weakly struck in hand area and top of skirt line area just like its sister 1927-S, this issue is also rather easily found in average to weak struck Unc condition. I have seen one fully struck piece, but it was very "baggy" and cleaned or dipped. This coin brought $1,200 (3/76 NERCG) to an unraised mail bidder. This date is seldom even called "Gem" by dealers or auction houses---much less being so! The next highest auction record is $1,150 (11/76 Kreisberg). The current retail value is $1,000 to $1,500---but a FSG specimen in auction might bring $2000 or more on today's market.

1929-D: This is a low mintage date---but thought to be rather common in Unc. It comes weakly struck, average struck and fully struck---somewhat like the 1918-D. Recently, however, renewed interest has pushed up the price rather substantially on nice pieces. The current retail value is $300 to $450---and the high auction record is $600 (7/76 NERCG). However, the $475 price brought at the 7/77 NERCG sale still seems rather high to me.

1929-S: Rated as slightly scarcer than the 1929-D, the 1929-S is generally easier to find in well struck condition. It seems that this issue's auction record is based as much on the value of the 1929-D as on its own merit. Renewed interest lately has raised the price somewhat. Current retail $325 to $450. The high auction record is $450 (7/76 Paramount "Elrod Sale").

1933-S: This is the last date of the "early date" set. It is very scarce in Unc ---but can be found in FSG condition. It comes struck about the same as the next year, 1934-S, and sells for about 10% to 25% more---but is at least five times as scarce in uncirculated condition! The current retail value is $550 to $750; the high auction record is $800 (7/76 Paramount "Elrod Sale"). Note: For some reason this date can be found in grades Fine, VF and full XF with no trace of the "19" in the date showing---all one can see is the "33": the 1933-S is UNIQUE in this distinction!

MISCELLANEOUS NOTES

Generally, the Philadelphia mints are the strongest struck, the Denver mints are usually average or better, while San Francisco are usually found weak to average. Some dates that can be found with a full hand, are typically struck with a weak head or no head (such as 1920-D and 1935-D)---but several other dates which may be found with full heads are typically weak strikes in the hand and skirt line areas (such as 1927-S, 1928-S, 1940-S and 1941-S). A few dates are usually found weakly struck in both the areas of head, hand and skirt lines---such as 1919-D, 1919-S, 1920-S and 1921-S.

What determines the current TOP VALUE of uncirculated Walking Liberty halves? (a) The availability of Choice and Gem coins which are fully struck, (b) The assumption of collectors and investors as to which dates fall into the above category --whether true or not! (c) The number of collectors or investors that are buying in the various "divisions" of the 1916-47 set (that is, the "short set", the 1934-47 group or the full 1916-47 set.)

EXAMPLE: In a typical auction, assume that a 1920-P is to be sold and that it is in FSG condition. Also, there is a 1934-S in approximately the same condition. The 1920-P is perhaps five to ten times (or more) as scarce as the 1934-S in FSG condition. However, the 1934-S will bring about fifty percent more than the 1920-P. The reason is that maybe two or three collectors, investors or dealers are interested or willing to buy the 1920-P---while there may be twelve to fifteen bidders interested in the 1934-S. Thus, the 1934-S, because of DEMAND, will bring substantially more than the far scarcer 1920-P!

Common date coins in the following listings were computed on a basis of gold bullion at $167.05 per ounce.

The more common date silver rolls were computed on a basis of silver bullion at $4.94 per ounce.

CIRCULATED ROLLS

Earlier rolls average good, later rolls usually include higher grades.

DECEMBER — 1977

Vol. II No. 12 Single copy price: $2.00

BARBER QUARTERS

---an in-depth look at an undervalued series!

PART ONE

by Gene B. Edwards

EDITOR'S NOTE: With this December issue of the MONTHLY SUMMARY, the CDN is very pleased to present Part One of a two-part in-depth analysis of the Barber quarter series by Mr. Gene B. Edwards. Mr. Edwards began collecting coins at the age of fourteen---and was thoroughly involved in the hobby during his entire Army career. As a Retired Officer, he became a full-time coin dealer in 1974. Interestingly, the first uncirculated coin Mr. Edwards acquired (in 1955) was a Barber quarter---and he has been "working on the finest possible set" since then! Thus his experience with the still vastly underrated series enables him to author this important article with virtually complete authority.

Recent strong collector demand, coupled with very impressive auction results, has finally begun to emphasize the true scarcity (and, indeed, rarity) in Choice and especially Gem condition of many dates which have in the past been considered easy to locate. The prices listed on Page Two are current retail values for properly graded specimens---and we are certain that readers will not only find these listings enlightenting but that they will enjoy the important and new information contained in the comments which follow each date. The MS-60/65 prices should prove invaluable to those dealers and collectors who have been somewhat in the dark about how to price specimens which fall just short of the Choice MS-65 category---but which are definitely better than Unc MS-60. The prices for Gem MS-65+, of course, will be extremely importnat for those who are lucky enough to own or to acquire such outstanding pieces. (Part Two of this article will appear in our January issue.)

THE DESIGN

The extremely long life of Gobrecht's Seated Liberty design had begun to bore the American public and the desire for a newly designed metallic masterpiece was eventually communicated to the government. By 1890, multitudes of aspiring designers were submitting their "brainchildren" to the Treasury with the hopes of the immortality which would be ingendered by their initials on the Coin of the Realm---only to have their dreams shattered as the omnipotent Charles Barber, seated at his desk in the Philadelphia Mint, rejected and deposited those ideas in the handiest trash receptacles.

Barber's rejection of each and every submission, did not, however, stop the clamor for new coinage. So, Barber solved the problem with a simplistic design which was not only accepted but became one of the most popular designs of U.S. coins. Upon close examination we note that the obverse is merely a reversal of the Morgan Dollar design with some very minor changes---while the reverse "strangely" resembles the Heraldic Eagle reverse of the early Bust type coinage. Some may, with good reason, doubt Mr. Barber's talent for innovative design. As an interesting aside, 1892---the first year of the design, saw two types of reverse (which is a little known fact except to the quarter specialist---but worth mentioning). Type I, in which the Eagle's left wing tip covers less than half of the "E" in UNITED and the later Type II (which became standard) where the left wing tip covers most of the "E" including the middle serif, with just the tip of the upper and lower serifs completely visible. This reverse duplicity appears on all Mints of 1892, and frankly the reason for the change is befuddling. The Type I reverse is obviously scarce---but not rare. Another minor design change occured in 1901, when a new obverse hub was introduced, in which the leaves are slightly larger and longer and the berries are also larger. Unfortunately, the reverse seems to have suffered from this change, since from this point on, even Philadelphia Mint specimens become more elusive in full strike.

Although multiple prooflike branch mint Barber quarters have been described as "Branch Mint Proofs", "Presentation Strikes", etc., for the purpose of sale---either privately or in public auction---documentation of only two such coins exist (Breen, 1977). The two authenticated and attributed pieces which can be accounted for by this author are the 1893-S struck in proof---sold at the Suburban Washington Auction in 1975 (lot 186) and the 1895-O struck in proof---sold at a Lester Merkin Auction in 1969 (lot 182).

Since we are going to examine both the MS-60/65 and MS-65+ Barber quarters, I will prelude this listing by defining these grades as I apply them to this series---understanding the various "mint-made problems" of Mr. Barber's design.

CHOICE MINT STATE 60/65 — GRADING CRITERIA

First, this coin is obviously better than UNC-60. It will exhibit full or nearly full mint luster. It will be uncleaned; it will not have been polished or artificially colored. The strike will be average for the issuing mint and, most important, the surfaces will be Choice. That is, it will not exhibit any overpowering problems---such as deep gashes, heavy or multitudinous bagmarks, heavy "slide marks" from mishandling or deep rim nicks. An oversimplification, perhaps, but the coin will fall somewhere between MS-60 and just short of MS-65---keeping in mind the strike of the issuing mint. Strike is not due to wear or the lack of it, so it should not effect the grade. A soft strike will not lower the grade, so do not be lulled into applying these standards to the "fully struck slider"---it will not miraculously become uncirculated because it has full stars and claws! After years of searching you may find that the Choice 60/65 coin is the best you can find in certain dates of this series---or the only coin that you can afford in order to complete your set. There is no shame to that! Even in some of the so-called "common dates", I've looked unceasingly for superb Gems only to be faced with the possibility of their non-existance---at least for the time being. If the coin is truly nice you will have no trouble disposing of it---when and if that super piece comes along so that you can upgrade those few critical points.

GEM MINT STATE MS-65+ — GRADING CRITERIA

Surfaces: Whether your taste lies in brilliant frosty coins or original toned examples of this series, one of the major problems in this series (and all of the coins of this design) is the fact that Liberty's cheek is high on the obverse of the coin---and therefore very vulnerable. Marks from stacking or handling at the mint are quite common and account for most of the small abrasions which plague this series. The "MS-70" Barber quarter is a virtually nonexistant creature, so in series, we will have to address ourselves to the MS-65+ coin which will exhibit full blazing luster with either satin, frosty, or in some cases, deep prooflike surfaces. One or two microscopic marks will usually be apparent---most commonly on the obverse device---while the reverse, in most instances, will be nearly perfect.

Strike: Here again, the Barber quarter fell on hard times at certain of the Mints---most noticably at the New Orleans and Denver branches. Additionally, we find considerable differences in quality of strike from year to year at the same mint. Even in the Philadelphia mint issues striking will vary. As an example, the strike from 1892 through 1901 is usually excellent, exhibiting full star radials and full claws on the eagle---however, as we go from 1902 through 1916, the strike seems to become progressively indifferent. Most New Orleans and Denver pieces are softly struck, particularily on the eagle's notoriously weak left claw; fully struck specimens, when available from these branches, invariably bring a substantial premium. In most instances the San Francisco issues are well struck---but again we find a good deal less than perfection from this branch from 1902 until the end of the design life. (As an aside, some magnificent semi and fully prooflike specimens have surfaced from this mint.) For the purpose of our valuation, the Mint State 65+ specimen should be fully struck up, or substantially above average for the date and mint of issue. Obviously, coins exhibiting full radials in the stars, fully defined hair at Liberty's brow and full cross-hatching on the eagle's feet are most desirable. However, I will be the first to acknowledge that there are dates which I strongly believe will never be located in Gem FULLY STRUCK condition!

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis and the MONTHLY SUMMARY and Complete Series Pricing Guide reports on those areas covered on a monthly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the CDN publications make them a very accurate reflection of the market.

INVESTORS NOTE: the prices in the CDN publications are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

SUBSCRIPTION INFORMATION: The MONTHLY SUMMARY and Complete Series Pricing Guide is mailed each month to subscribers of the weekly COIN DEALER NEWSLETTER at no extra charge!

A subscription to the weekly COIN DEALER NEWSLETTER is: $11.75 for three months, $40.00 for one year and $70.00 for two years. A subscription to the MONTHLY SUMMARY and Complete Series Pricing Guide alone is: $15.00 for one year and $25.00 for two years.

DATE	MS-60/65	GEM MS-65+	COMMENTS
1892	$200	$350 and up	Usually available as it is the first-year-of-type---however, 65+ coins are rather elusive.
1892-O	$275	$450 and up	Fully struck Gems seem to be available at a price.
1892-S	$350	$550 and up	Very scarce and undervalued; most offered are cleaned-up unc's.
1893	$250	$375 and up	Gem full strikes are becoming difficult to locate.
1893-O	$300	$475 and up	Fully struck pieces can usually be located at a premium. Superb Gems are very scarce and underrated!
1893-S	$350	$575 and up	Very scarce in anything over MS-60; fully struck Gems are exceedingly difficult to locate.
1894	$250	$425 and up	Too long considered as common as the 1892---but not so! Scarce---with prices going as high as $550 for Gems!
1894-O	$350	$550 and up	Fully struck Gems are very scarce and undervalued at present.
1894-S	$350	$650 and up	Vastly undervalued date in superb condition; seldom offered in MS-65 condition at recent auctions. (Beware of fully struck sliders.)
1895	$275	$450 and up	Like the '94 and '96, an increasingly scarce and underrated date in MS-65+ condition.
1895-O	$350	$650 and up	Fully struck original Gem specimens have always commanded a premium. A "superb Gem" recently traded hands at $775; a good bet to go much higher!
1895-S	$300	$650 and up	A long overdue date---though readily available in 60/65. Superb Gem specimens are rare and very elusive.
1896	$300	$475 and up	A "sleeper" date for many years---and one of the scarcest "P" mints. Prices realized for Gem coins have hit the $650 mark!
1896-O	$650+	$1400 and up	Very rare in fully struck Gem condition. Most pieces seen are notably weak strikes and have usually been scrubbed up. True 60/65 coins also seem to be quite elusive. A real toughie!
1896-S	$1700-$2000	$4000 and up	And we mean UP! Very few true Gem examples have been available during the last five years and those have commanded premiums of multiple "bid". A fully struck Gem recently traded between dealers for $4600; obviously a rare date in AU and up. Many "sliders" are offered as uncirculated coins due to rarity. This date is seen in full prooflike condition!
1897	$250	$375 and up	This date is usually available. Gems have been averaging sales in the $400-$425 range.
1897-O	$600+	$1400 and up	Seemingly more available than the 1896-O in 60/65---but a very rare date in Gem condition. Most are soft on the eagle's claw. A fully struck Gem is currently being offered for sale in excess of $2000!
1897-S	$650+	$1500 and up	Certainly one of the rarest dates in the entire series; it appears less often at auction than most recognized rarities. Most "Gems" seen are barely 60/65 coins! (Probably worthwhile at $350 for a "slider unc".)
1898	$250	$375 and up	This date is usually available without much difficulty.
1898-O	$550	$850 and up	Again a very undervalued date in all uncirculated grades; most pieces seen are "sliders".
1898-S	$450	$800 and up	Most specimens fall in the 60/65 category; they usually have heavy obverse marks but are very sharply struck. This date is often related to the 96-S through 03-S issues---but it is the most common of that run.
1899	$250	$400 and up	This date is somewhat scarce in 65+ condition.
1899-O	$450	$1000 and up	Very scarce in Gem full strike; mostly seen semi-prooflike and indifferently struck.
1899-S	$475	$1000 and up	Very scarce in Gem condition. An MS-65 coin brought $725 in auction in November 76! Quite elusive in any of the unc grades.
1900	$250	$400 and up	Rather scarce in 65+ condition---otherwise available.
1900-O	$450	$1000 and up	About the same rarity as the 1899-O---although fully struck pieces are seemingly non-existant.
1900-S	$400	$750 and up	Very scarce; a Gem is currently being offered at $1500! (Not as rare as the 1899-S.)
1901	$250	$400 and up	Full strikes are becoming very difficult to find.
1901-O	$650+	$1500 and up	Very rare. An almost fully struck Gem sold in October for in excess of $2000! This date has been vastly undervalued for years.
1901-S	$6000+	$10,000 and up	The "King of the Barbers"! Transactions in any of the uncirculated grades are few and far between---with auction records rather sketchy. Two Gems traded in 1977---with one breaking the $10,000 mark! Three Mint State peices have appeared in auction in the last five years---with each precipitating frantic bidding. (Most specimens offered as MS-60 coins are cleaned up AU's.) Surfaces are either frosty or semi-prooflike and the strike is usually good to excellent. Most of the pieces we have seen exhibit some rather obvious die striations---particularily between the stars and rim and in the obverse fields to the stars. The sky is the limit on this date!
1902	$250	$375 and up	Fully struck pieces are very scarce.
1902-O	$500	$1000 and up	Rare in most uncirculated grades; MS-65+ examples virtually non-existant. A Gem recently traded between dealers for a price in excess of $1100 at the New York Grand Central show!
1902-S	$450	$800 and up	A long overdue date; rarely seen in Gem fully struck condition. This date has a long way to go. Rare!
1903	$250	$375 and up	Fully struck pieces are scarce.
1903-O	$350	$550 and up	Current valuation seems about right, although fully struck pieces command a high premium. Much more easily available than either the 02-O or subsequent "O" mints.
1903-S	$450	$800 and up	The same general comments as for the 02-S.

(The second part of this article will appear in the Janury MONTHLY SUMMARY)

GOLD SERIES by date

Common date coins in the following listings were computed on a basis of gold bullion at $162.10 per ounce.

Gem MS-65/70 specimens are worth more than the MS-65 prices listed below.

CIRCULATED ROLLS

The more common date silver rolls were computed on a basis of silver bullion at $4.80 per ounce.

Earlier rolls average good; later rolls usually include higher grades.
